ATTN: TSDIN

1. The following report received from the Maxwell Flight Service Center, Maxwell Air Force Base, Montgomery, Alabama is quoted for your information:

"On 24 July 1948, the aircraft dispatcher on duty at Warner Robins AF Base notified the Maxwell Flight Service Center that a fluorescent squash-shaped object with a flaming exhaust had been sighted at 0250E. This object was sighted by Mr. [REDACTED], a member of the civilian alert crew, who stated that the object appeared to be wingless and was headed south at terrific speed. Mr. [REDACTED] estimated the object to be about twenty-five feet in length.

At 0315E Eastern Airlines Houston-to-Atlanta flight reported similar object in vicinity of Lawson AF Base, and was forced to alter course to avoid collision.

No further information available this Center."

2. An information copy of this report has been forwarded to the Directorate of Intelligence, United States Air Force.

6th OSI District	9 Sep 1948	10 Aug - 25 Aug 1948	Walter M. Cassidy
Title		Character of Case	
PROJECT "SIGN"		Special Investigation	

SYNOPSIS

1. Basis for investigation:

At 1020, 8 August 1948, this headquarters was advised by letter, dated 6 August 1948, originating at Hq. Air Materiel Command, Dayton, Ohio, to conduct an investigation pertaining to an aerial phenomena reported by various people within

2. Facts: 6th OSI District.

At 0945, 10 August 1948, Lt Colonel Cropper interrogated Mr. [REDACTED], Robins Air Force Base employee, regarding an aerial phenomena witnessed by [REDACTED] while on duty at Robins Air Force Base the night of 23 July 1948. [REDACTED] stated the exact time and pertinent facts regarding the phenomena. [REDACTED] appears to be a competent and qualified observer.

On 19 August 1948, Special Investigator Cassidy contacted Robins Air Force Base Flight Operations and the Base Weather Station. All reports pertaining to weather conditions and relative time substantially support [REDACTED] statements made to Lt Colonel Cropper.

On 12 August 1948, S/A Montgomery, 111th CIC Det, contacted personnel at the Atlanta Naval Air Base and adjoining municipality regarding a reported aerial phenomena. It was generally agreed that the phenomena resembled a shooting star, despite the fact that course and altitude did not correspond to the characteristics of such an aerial phenomena.

During the period, 24 - 27 Aug 1948, Special Investigator Morris interviewed seven (7) residents of Augusta, Ga. regarding reported aerial phenomena. It was concluded that objects observed were not aircraft, but probably of meteoric nature.

UNCLASSIFIED

SUBJECT: Project "SIEN" CHARACTER: Special Investigation DATE: 9 Sep 1943
FILE NO: 333.5 (24-1)

DETAILS:

At 0945, 10 August 1943, Lt Colonel Cropper, Acting District Commander, 6th District Office of Special Investigations, interrogated Mr. [REDACTED], Robins Air Force Base employee, regarding an aerial phenomena witnessed by [REDACTED] while on duty at Robins Air Force Base on the night of 23 July 1943. The following is a transcript of this interrogation:

- Q. 1. What is your full name, age, address, and employment?
- A. 1. [REDACTED] I am 23, unmarried, and live at [REDACTED], Macon, Georgia. I am a member of the Transient Maintenance Alert Crew on the midnight shift - 2400 to 0800 hours.
- Q. 2. Do you recall the date and time that you saw this object?
- A. 2. It appeared on Friday night, the 23d of July 1943 between 0140 and 0150 hours, Eastern Standard Time. I was standing fire guard on a C-47, directly across from Operations, and I had to take down the take-off time which was between 0140 and 0150.
- Q. 3. What was the weather condition?
- A. 3. Good visibility and no clouds.
- Q. 4. Were there any lights around you? Outside lights or beacons?
- A. 4. I am not sure whether the flood lights on the hangar were on or off. I was facing the north looking away from any possible lights.
- Q. 5. In what direction did you see this object?
- A. 5. It was coming out of the north. I was facing the north and actually didn't see it until it got overhead, but it came out of the north and was in my view for about twenty seconds. The last I saw of it the object was taking a southwest course.
- Q. 6. Describe in your own words what you actually saw from the time it appeared until it disappeared.
- A. 6. The first thing I saw was a stream of fire and I was undecided as to what it could be, but as it got overhead, it was a fairly clear outline and appeared to be a cylindrical shaped object with a long stream of fire coming out of the tail end. I am sure it would not be a jet since I have observed P-34s in flight at night on two occasions.

[REDACTED]

UNCLASSIFIED

SUBJECT: Project "SIGN" CHARACTER: Special Investigation DATE: 9 Sep 1948
FILE NO: 333.5 (24-1)

DETAILS: (Cont'd)

- Q. 7. Approximately what was the height and altitude of this object?
- A. 7. Three thousand feet - - it could be lower or higher, at night it is difficult to judge distance.
- Q. 8. What was the size and shape in comparison to the trail of fire?
- A. 8. The trail of fire was longer than the cylindrical shape of the object.
- Q. 9. Was the entire object illuminated? Describe its shape.
- A. 9. I noticed a faint glow on the belly of the wingless object - - a phosphorescent glow.
- Q. 10. Are you familiar with shooting stars?
- A. 10. Yes Sir. I thought at first it was a shooting star or a meteor, but a shooting star falls perpendicular. This object was on a straight and level plane. When it disappeared it disappeared from sight due to distance rather than drop.
- Q. 11. How did it differ from a shooting star or meteor in size and shape?
- A. 11. I have only seen one or two meteors and they appear to be round or more or less ball-shaped and this object was long and cylindrical in shape.
- Q. 12. What was the color of the light?
- A. 12. It was a trailing faint blue flame.
- Q. 13. Was there any moonlight at this time?
- A. 13. I didn't pay too much attention to the moonlight. I wouldn't say for sure whether there was a moon.
- Q. 14. Where did the light that illuminated the shape of the object seem to come from?
- A. 14. It looked like it was close to the bottom deck.
- Q. 15. Did it give you the impression that there were windows or holes and did the decks appear to be divided into sections?
- A. 15. I am not sure. It would be hard to tell if there were windows and a divided deck could not be recognized from the ground.

BGO DIR 5200.10

SUBJECT: Project "SIGN" CHARACTER: Special Investigation DATE: 9 Sep 48
FILE NO: 333.5 (24-1)

DETAILS: (Cont'd)

- Q. 16. Did you read the newspaper account of the two civilian pilots who saw this strange object about the same time and did the paper's description seem to refer to the object you saw?
- A. 16. I read the write up about the rate of speed. I don't see how they could tell if it had square or round windows but the description seemed to fit my impressions.
- Q. 17. Was there anyone with you when you saw this object?
- A. 17. No Sir. I was standing in front of No. 2 engine and I tried to call the co-pilot's attention to the object in the sky. He had already put his headgear on before I could get his attention and the object was gone.
- Q. 18. With whom did you first discuss this matter?
- A. 18. I called the tower and asked them if they saw it. They didn't.
- Q. 19. What was their reaction regarding this object?
- A. 19. They thought I was drunk or seeing things.
- Q. 20. Were you unusually fatigued at this time?
- A. 20. No Sir, I had been merely reading Air Force magazines prior to this time.
- Q. 21. Have you ever had occasion to read much or study Air Force magazines, experiments with guided missiles, objects, or similar material?
- A. 21. No Sir, only what I could get out of Air Force and Aviation magazines.
- Q. 22. Were you in the Air Force during the war?
- A. 22. Yes Sir, I was an Aircraft Engine Mechanic with a rating of Buck Sergeant in the Ninth Air Force.
- Q. 23. Is there anyone else on the Base who saw this particular object that you know of?
- A. 23. No Sir.
- Q. 24. What type of construction, color, size, and material did this object appear to resemble?

[REDACTED]

SUBJECT: Project "SIGN" CHARACTER: Special Investigation DATE: 9 Sep 48
FILE NO: 333.5 (24-1)

DETAILS: (Cont'd)

Q. 33. How long have you worked here?

A. 33. Since September 1947.

Q. 34. When did you get out of the Air Force?

A. 34. I was discharged in March 1947 as an enlisted reserve Buck Sergeant engineer.

Q. 35. Is there anything further you would like to add to aid in this evaluation?

A. 35. Yes Sir. During the Battle of the Bulge, a Sergeant and myself were on guard duty and saw something that resembled this object in question. We later found that we had witnessed the launching of a German V-2 rocket. It carried a stream of fire that more or less resembled this object. This object looked like rocket propulsion rather than jet propulsion, but the speed and size was much greater.

Q. 36. Did the altitude, speed, and size of this object have any similarity to a meteor or shooting star?

A. 36. No Sir.

Q. 37. What else did you associate your thoughts with when you first saw this object?

A. 37. It looked like a rocket and was the shape of an XS-1. It was too large for an XS-1. My final conclusion was that it was energized by rocket propulsion.

Q. 38. Were you excited when you told the other people about this object?

A. 38. No Sir. They more or less kidded me about it and was informed that Flight Service wanted to see me.

Q. 39. Who did you talk to in Flight Service?

A. 39. I talked to a man over the interphone system but did not know his name. He wanted to know whether I was a civilian or military and asked me a few questions. I think Flight Service turned it over to Air Defense Command the next morning.

DOWNGRADED AT 1 YEAR INTERVALS
DECLASSIFIED AFTER 12 YEARS.
DOD DIR 5200.10

HARVARD COLLEGE OBSERVATORY
CAMBRIDGE 38, MASSACHUSETTS

July 13, 1961

Maj. William T. Coleman
SAFOI-3
Room 4C-922
The Pentagon
Washington 25, D. C.

Dear Bill:

On my return from the western swing I find a sizable amount of accumulated flying saucer material. I want to thank you and Major Friend, and Colonel Evans for all of the helpful material, including the suggestions for improving our chapters. Many thanks to all of you.

On my western trip I ran into a daytime sighting that was a honey. I was driving on Highway 54 from El Paso, Texas to Alamogordo, New Mexico, and I was in the outskirts of the latter city, having just turned west where the road meets the one coming from Las Cruces and the Holloman Air Force Base. The time was 4:00 p.m. The sun was shining, although the sky was heavily clouded toward the west. It had clearly been raining in the mountains and heavy dust storms had forced me to stop two or three times along the highway. I was suddenly startled to see a V-shaped formation of flying saucers heading eastward directly toward me. They appeared to have a reddish glow and were moving very rapidly. I had the impression that they were nearly at cloud level. They approached me rapidly and suddenly seemed to drop in on me. I then realized that they were merely a grouping of tumbleweeds carried aloft in the heavy wind. They were, perhaps, some hundred feet over head. The weird glow was caused by the illumination of the setting sun. Keep this in mind for similar reports.

and I have been struggling to interpret the famous Rapid City, South Dakota, case of 12 August, 1953. The report has so many features that are suggestive of the mirage of a star, that we have strongly leaned to that interpretation. The bright star, Capella, which happens to be circumpolar at Rapid City, was indeed very close to the horizon, just east of north. We do not have very good times or estimates of the total duration of the sighting. I wonder if you have any additional material that you could send us, in view of the importance that the UFO boys attach to this sighting. In particular, we should like to know what is the radius, in miles, of the radar screen and what was the frequency. The weather records indicate

Maj. William T. Coleman

July 13, 1961

-2-

that a very sizable temperature inversion was present, and this was ample to magnify some of the radar and optical effects. The radar, especially, could have been deflected back to the ground and the moving object might have been some secondary reflection from the plane itself. Is there any additional information about the man who claimed to have checked the UFO against the triangle of stars, and deciding that it moved with reference to those stars? Sounds that it might have been autokinesis, unless this motion was really very sizable.

One further question that we have. ^{Sur} A study of the ^{factus} [redacted] case indicates that the UFO was merely a meteor. Apparently this was a considered solution in the early days. We wonder why it was abandoned.

Thank you for the additional sightings, all of which are useful and lend freshness to the book. Also, I think you were going to send me one from the south, where airline pilots reported not only seeing a saucer but certain roughness of the air which, according to your own observation, was due to forest fire or oil well fire, or something of the sort.

Again, with our many thanks and best wishes, I am

Cordially yours,

[redacted signature]

DHM:gq

P.S. I'm scheduled to be in Washington on July 26. If time permits, I may run over to the Pentagon and talk with you some at that time.

[redacted]

also on the 21st

Col. Evans

[REDACTED]
Wheat Ridge, Colorado
February 17, 1960

AIR TECHNICAL INTELLIGENCE CENTER
Wright-Patterson Air Force Base
Dayton, Ohio

Dear Sir:

Enclosed is an article concerning a mysterious silvery tubular flame-belching object that flashed through western Alaska skies late Sunday. I feel sure that this object is the same type object that almost collided with an Eastern Airlines DC-3 in 1948.

I would like to take this time to review this case for I think it is outstanding.

For on the evening of July 24, 1948, an Eastern Airlines DC-3 took off from Houston, Texas. It was on a scheduled trip to Atlanta, with intermediate stops in between. The pilots were Clarence S. Chiles and John B. Whitted. At about 2:45 a.m.; when the flight was 20 miles southwest of Montgomery, the captain, Chiles, saw a light dead ahead and closing fast. His first reaction, he later reported to an ATIC investigation team, was that it was a jet, but in an instant he realized that even a jet couldn't close as fast as this light was closing. Chiles said he reached over, gave Whitted, the other pilot, a quick tap on the arm, and pointed. The UFO was now almost on top of them. Chiles racked the DC-3 up into a tight left turn. Just as the UFO flashed by about 700 feet to the right, the DC-3 hit turbulent air. Whitted looked back just as the UFO pulled up in a steep climb.

Both of the pilots had gotten a good look at the UFO and were able to give a good description to the Air Force intelligence people. It was a B-29 fuselage. The underside had a "deep blue glow." There were "two rows of windows from which bright lights glowed," and a "50-foot trail of orange-red flame" shot out the back.

By now, does ATIC know what the object was? If so, does ATIC also know where the object came from?

One thing for sure when you take a object traveling at tremendous speed about 2,000 to 3,000 feet above the earth, that is tubular-shaped would most certainly also be a B-29 fuselage shaped, and both these objects had orange flames shooting from the tail. Let's all please sit back and think.

I will be looking forward in hearing from you.

Sincerely yours,
[REDACTED]

COUNTRY United States		REPORT NO. 102-107-79	CLASSIFICATION UNCLASSIFIED
AIR INTELLIGENCE INFORMATION REPORT			
SUBJECT Unidentified Flying Object			
REPORTED ON Alabama, Georgia, and Virginia		FROM Tech Intelligence Div, Intelligence Dept, Wright-Patterson AFB, Dayton, Ohio	
DATE OF REPORT 20 December 1948	DATE OF INFORMATION 24 and 26 July 1948	EVALUATION A-2	
REPORTED BY Robert R. Sneider, Captain, USAF		ON U. S. Citizens	

PROJECTS: "SIGN" ltr, Dept. of the AF, Hq USAF, dated 30 Dec 47 "Flying Discs"

Detailed interrogations have been completed of persons reporting undetermined flying objects in the vicinity of Montgomery, Alabama, 24 and 26 July 1948, between the hours of 2130 and 0245.

Analysis has been made of the compiled statements and the other available evidence of each individual interrogated. The analysis was undertaken as only one of 219 reported incidents with an objective of arriving towards a definite pattern or trend in order to determine whether the objects reported were of domestic or alien origin, or a natural phenomena.

COMMENTS: Analysis of data under Incident #144 reveals that four separate cases are involved; one having occurred on 24 July 1948 and the others on the 26 July 1948. A preponderance of evidence is available to establish that in almost all cases an unidentified object was seen within the times stated and on the same dates over an extended area pursuing a general course South. Descriptions as to size, shape, color and movements are fairly consistent.

1. The following comments are offered regarding conclusion number 4 of the attached report:

a. It does not appear logical to bring in a conclusion regarding space ships when it was not discussed in the body of the report. This is not a conclusion that is based on this report so it does not belong in "Conclusions".

b. The expression, "It is now aerodynamically feasible for subject configuration to fly" implies that it was not feasible until the report was written. This does not make sense.

2. It is suggested that a conclusion to replace that discussed above merely state that an aircraft of the configuration described could support itself in flight by aerodynamic forces.

Incident #144 -- near Montgomery, Alabama -- 24 July 1948
144a, b -- near Blackstone, Virginia -- 24 July 1948

The famous "space ship" sighting reported in incident #144 should be compared with #168 and 200, and also with #144a and b, which together constitute a separate incident if facts are correct as given:

For #144, there is no astronomical explanation if we accept the report at face value. The sheer improbability of the facts as stated, particularly in the absence of any known aircraft in the vicinity, makes it necessary to see whether any other explanation, even though far fetched, can be considered. The two reliable pilots obviously saw something. If one extracts from their reports parts of the description -- "tremendous bursts of flame," "cigar-shaped," "disappeared into a cloud," "orange-red flame," "time in sight five to ten seconds" -- one sees that this much, at least, could be satisfied by a brilliant, slow-moving meteor. The orange-red flame is particularly suggestive. It is pertinent also, that the only passenger awake at the time the two pilots sighted the object gave a description that does not tally with that of a "space ship" but does agree with that of a meteor.

It will have to be left to the psychologists to tell us whether the immediate trail of a bright meteor could produce the subjective impression of a ship with lighted windows. Considering only the [REDACTED] sighting, the hypothesis seems very improbable. However, not included in the summary but mentioned in the

UNCLASSIFIED

[REDACTED]

[REDACTED]

114

[REDACTED]

UNCLASSIFIED

Incident #144, 144 a and b -- page 2

valuable collateral material is the report of a qualified Robin air base observer, who stated that he saw a cylindrical object trailing a red flash of fire, but did not discern any windows or a double deck; (admittedly, from the ground he would have had less opportunity to do so). The time of his observation is exactly one hour earlier, if both times are given in EST (as is stated). It is interesting to note, however, that Macon, Georgia, and Montgomery, Alabama, are both on the line of flight as described by the Montgomery observers.

If these two sightings refer to the same object, there are two possible interpretations: One is that the object was some type of aircraft, regardless of its bizarre nature. The distance between Macon and Montgomery is approximately 200 miles. From all reports the object was travelling definitely faster than 200 MPH, so would have covered the distance between the two points in much less time than that noted. (The schedule is, of course, correct for an ordinary aircraft.)

The other possible explanation is that the object was a fireball, in which case it would have covered the distance from Macon to Montgomery in a matter of a minute or two. If the Montgomery observers had been using daylight savings time (the regular

UNCLASSIFIED

~~RESTRICTED~~

[REDACTED]

([REDACTED])
UNCLASSIFIED

Incident #144, 144 a and b -- page 3

commercial airlines connecting cities using daylight savings time operate on it?), then there would be no discrepancy in the time.

The conclusion seems to be this: If the difference in time is real, the object was some form of aircraft travelling at 200 mph. If there is no time difference, the object must have been an extraordinary meteor. The observation from two such widely separated points is the focal point of the investigation -- if one assumes that the same object was observed in the two cases. That there were two separate objects can most likely be ruled out by the sheer improbability of more than one such extraordinary object being seen on the same night, travelling over the same course, exactly one hour apart.

UNCLASSIFIED

[REDACTED]

[REDACTED]

116

[REDACTED]

UNCLASSIFIED

incident #144, 144 a and b -- page 4

The object reported in incident #144a and 144b was very probably a meteor.

It should be noted that this object was travelling in the same direction as the one reported in #144, although separated by some 400 miles. It is not unusual for a fireball to be seen along a path several hundred miles long. There is a time discrepancy of 15 minutes between the observations, however; any connection between #144 and 144a-b (in considering the meteoric hypothesis) necessarily hinges on whether this time difference was real, or not.

Memorandum

TO Captain J. F. Gill

ADDRESS

FROM [REDACTED]

ADDRESS

SUBJECT Report of Meteor seen on
July 24, 1948

DATE

August 3, 1948

I. At about 0230 on July 24, 1948, [REDACTED] and I, as pilot and captain on 571/23, saw what I believe was an unusual meteor. It was brighter than any I have seen before, and travelling in a horizontal direction, slightly above the horizon. I estimate that I saw it for about 3 seconds before it died out. At no time did it appear to travel in a downward direction. [REDACTED] and I talked about what we had seen and discussed the fact that a meteor, caused by gravity, could still appear to be travelling horizontally.

II. At the time of this incident we were travelling between Blackstone, Va., and Greensboro, N. C. The sky was clear and the visibility unlimited. We were on a magnetic heading of 240 degrees and I estimate that the object was on a bearing of about 210 degrees from us, that is, about 30 degrees to the left of our heading. It appeared to be travelling in a southerly direction, above but close to the horizon.

A. ORIGIN:

In compliance with verbal instructions from Maj General Cabell, Director of Intelligence, AFOI, this Hq proceeded to investigate the report concerning the sighting of an unidentified aerial object in the vicinity of Montgomery, Alabama, occurring 24 July 1948 between the hours of 0140 and 0245 EST.

B. ACTION INITIATED:

1. On 25 July 1948, Major R. A. Llewellyn, Project "SIGN" Officer, Mr. A. Dayarmond, Technical Assistant to Col Clingerman, Mr. A. C. Loedding, Assistant Deputy for Technical Analysis Division, and Capt R. J. Groseclose, Security Officer, proceeded to Atlanta, Georgia, where they interviewed Capt [redacted] and Mr. [redacted] EAL pilots, and obtained their signed statements as to the anomaly observed. Copies of these statements together with drawings executed by [redacted] and [redacted] are appended as Exhibit "A". On 31 July 1948, Maj Llewellyn personally interviewed Mr. [redacted], the sole passenger awake during the hours of 0140 and 0245 EST, as to what he saw while a passenger aboard the DC-3 piloted by [redacted] and [redacted]. His statement is attached as Exhibit "B".

2. Following the above interrogations, requests were disseminated to Hq USAF, Naval and commercial airlines by priority teletypes 2 Aug 1948 requesting data on aircraft movements in the general vicinity of Alabama, Florida, Mississippi, Georgia, South Carolina, Tennessee and North Carolina. Charts of these aircraft movements are submitted as Exhibit "C".

3. In compliance with Hq AMC letter dated 6 July 1948, the Sixth Office of Special Investigations (IG) District undertook an investigation pertaining to an aerial phenomena reportedly seen by various people within the 6th OSI District. A complete report of the various sightings, pages 1-16 is appended hereto as Exhibit "D". Further reports and statements as to reliability are also appended.

4. After the statements were received, a complete analysis as to the date and time, geographical location, and description of the object was charted. The completely assembled data, i.e., statements of witnesses, reliability statements, airline schedules and the collated data chart were forwarded to the various technical agencies to effect an evaluation and interpretation of the technological factors involved.

C. FACTUAL DATA:

1. The collated data chart (Exhibit "H") was drawn up to effect a trend or pattern in regard to the reported sightings.

a. From this chart it is evident that three or possibly four separate incidents were involved:

- (1) That pertaining to sightings by [redacted]
- (2) That of [redacted]
- (3) That of [redacted]
- (4) That of [redacted]

Memorandum

TO Capt. J. F. Gill ADDRESS LGA

FROM [REDACTED] ADDRESS LGA

SUBJECT Trip 573 DATE August 5, 1948
Strange Object Sighted

Trip 573 checked Blackstone, Va. at 0219, July 24, 1948
Estimated Raleigh-Durham, N. C. at 0259
Flight Plan VFR Washington to Raleigh-Durham direct.
Weather at Blackstone at 0230 D/ 70 D 4GF 112/73/72/ wsw5/987
Greensboro and Raleigh-Durham both had E/ 15 plus.

Shortly after checking Blackstone and as near as we can place the time, approximately 0230, we picked up a trail that appeared to be a jet or rocket trail traveling at a terrific speed.

The object leaving the trail was traveling in a southwesterly direction, and as nearly as we can place the degree of travel, 230° . Our heading at the time was 215° .

The trail at no time crossed our flight path. It was on the distant western horizon at approximately 20° above the horizon. The trail covered an 80° to 90° arc laterally.

Att: Col. McCoy - M.C.I.A.

Dear Colonel McCoy:

I am writing to you at the request of Captain Eddie Rickenbacker regarding a request made by a Mr. A. C. Loedding, who stated that he represented your office.

Mr. Loedding came to my office this noon in civilian clothes, showed me some travel orders, and an identification card, and requested information from me as to the occurrence over Alabama on Saturday morning, July 24th, where two of our pilots saw an aerial phenomenon on their flight path.

Mr. Loedding requested some information from us about the pilots and the event itself, together with a statement of policy from this company.

Before doing anything in connection therewith, Captain Rickenbacker has suggested that I write to you for confirmation of this request and whether I should give it to Mr. Loedding or send it directly to you.

I would very much appreciate your advising me on this matter not later than Monday, by calling me collect, if you will, at Circle 6-3900.

Sincerely yours

[Redacted signature]

Memorandum

TO: S. L. Shannon

ADDRESS: New York

FROM: F. A. Stone

ADDRESS: Atlanta

SUBJECT: Capt. [REDACTED]
Pilot [REDACTED]

DATE: August 5, 1946

As per your request, I give you below a brief outline of the employment of Capt. G. S. Quinn and Pilot J. B. Whitted by Eastern Air Lines.

Capt. [REDACTED] - Capt. [REDACTED] was employed January 4, 1940. He served Eastern Air Lines as a co-pilot up until the time he went into the Army on March 14, 1942. He returned to Eastern Air Lines on October 2, 1945. During the period of [REDACTED] service as co-pilot with Eastern Air Lines, he showed above average ability, with a progressive and conscientious attitude towards the company and his job. Immediately after he returned from the Army, he was checked out as captain, and started flying the line. He has had an exceptionally good record as captain, and appears to be very conscientious in all details of his job. He works very good with the CAA and Air Canada, and has made any number of good suggestions to the company towards improvements and every-day flying procedures.

In my opinion, [REDACTED] is a very stable person. He is truthful and sincere in every respect, and his loyalty to Eastern Air Lines has been unquestionable.

Pilot [REDACTED] - Pilot [REDACTED] was released from the Army in November 1945, and applied for a position with Eastern Air Lines on November 27, 1945. His application was approved, and he was employed on July 1, 1946. Since that time, Pilot [REDACTED] has shown constant improvement, and his pilot progress report grades are above those of the average co-pilot. Pilot [REDACTED] is very conscientious, and in his work he appears to be very progressive. On our standardization sheets, he is now qualified as exceptionally good captain material.

In my estimation, Pilot [REDACTED] is of a stable nature, and is very truthful in his statements.

F. A. Stone

Intelligence Department
Wright-Patterson AFB, Dayton, Ohio

102-122-79

CLASSIFIED

2

5

b. To exclude irrelevant factors in a systematic manner, the information presented in Exhibit "H" is presented in the order of occurrence and significance.

(1) Incident #1

- a. Object was sighted 24 July 1948 between 0140 and 0150 EST from the ground at Robins Air Force Base, Macon, Georgia.
- b. Object was again sighted from an altitude of 5,000 feet by [redacted] and [redacted] while flying a DC-3 some 20 miles south of Montgomery, Alabama. The time of the sighting was 24 July 1948 at approximately 0245 EST.
- c. Both the [redacted] sighting and that of [redacted] and [redacted] describe the object as "cigar" or "cylindrical" in shape. (McKelvie perceived only the glow emitted by it)
- d. All observers agree that the object was traveling in a general southerly heading and that it was trailed by a flame varying in color and that it behaved like a normal craft insofar as disappearing from the line of sight was concerned.

NOTE: It is a known fact that atmospheric conditions such as varying degrees of humidity and incidence of light refraction often influence the color of the light observed. This would serve to explain why many observers conflict in their descriptions as to color of light displayed by the object or its trail.

- e. Four witnesses to this sighting are involved; three are trained observers. In no instance were there any indications of subversive or ulterior influences involved.
- f. Both the [redacted] account and that of [redacted], [redacted] and [redacted] were officially made within a period of time that would preclude any chance of impressions being gained from radio or newspaper reports.

(2) Incident #2

Object #2 was observed by [redacted], [redacted] and [redacted] at 0230 hours 24 July 1948, while airborne, between Blackstone, Virginia, and Greensboro, North Carolina. This sighting is considered separately since the descriptions of speed as "meteoric" or "terrific", the manner of travel described as an arc or horizontal, and the fact that it "faded like a meteor" seem to indicate that the object seen was not the one observed in Incident 1.

(3) Incident #3

This object was observed between 2100 and 2300 hours 26th July 1948 at Chamblee, and Augusta, Georgia, by observers [redacted]. This object was not thought to be a meteor in that it maneuvered. The glow was described as varied in color but predominantly brilliant blue-white. The course was described as generally "southern".

██████████ INCIDENT
24 July 1948

At 2:45 in the morning, the pilot and co-pilot of an Eastern Airlines DC-3, flying at 5000 feet between Mobile and Montgomery, Alabama, sighted a dull red exhaust some 700 feet ahead, a little above and to the right of the airliner.

Captain ██████████, the pilot, immediately turned to his co-pilot, J. ██████████, and remarked: "Look, here comes a new Army jet job." The object approached in a slight dive, deflected a little to the left and passed the plane on the right, almost level and parallel to the flight path, at a distance of approximately one-half mile. After passing, it pulled up sharply and disappeared into a cloud.

The object appeared to be a wingless aircraft, 100 feet long, cigar shaped and about twice the diameter of a "B-29." It had no fins or protruding surfaces. ██████████ thought it had a "snout" similar to a radar pole on the front and he had the impression there was a cabin with windows above--much like a pilot compartment--except that it appeared brighter. The illumination inside the body itself approximated the brilliance of a magnesium flare. He saw no occupants nor did Whitted. Visible from the side only, was an intense, fairly dark, blue glow running the entire length of the object beneath the fuselage.

The glow reminded ██████████ of a blue fluorescent factory light. The exhaust was described as a red-orange flame, the lighter color (orange) being predominant about the outer edges. ██████████ thought the flame flared out from a nozzle in the rear which he thought he perceived. The flame extended some 30 to 50 feet behind the object and became deeper in intensity (redder) and increased in length as the object pulled up into a cloud. No disturbance was felt from air waves, nor was there any wash or mechanical disturbance when the object passed. No sound was heard.

Co-pilot ██████████'s attention was drawn to the object by ██████████ remark. His description of the object and its maneuvers was very similar to that of ██████████ except that he did not observe a cockpit in front nor did he see any radar "snout." His drawing and description also indicated windows or openings on the side. He estimated the object passed at greater distance than did ██████████. He saw the "exhaust" as a parallel wide flame which appeared to edge from the entire rear of the object rather than from a nozzle never greater any wider than the width of the object itself, although he noticed the increased length of the flame as the object "pulled up."

The night was clear with a bright moon and broken cloud coverage of 4/10 at 5000 feet. Both estimated the object to be in sight approximately 10-15 seconds.

The case was evaluated as an obvious "fireball" but was carried as unidentified for a time in the Air Force Files. The initial evaluation was made in 1948 by Dr. J. Allen Hynek. Current analysis of the data substantiates Dr. Hynek's conclusion and the case is evaluated as a meteor sighting.

*****13
JULY 23, 1948 MONTGOMERY, ALABAMA (KEYHOE-1960 P 87) 3 WITNESSES00

ON JULY 23, 1948, AN EASTERN AIR LINES DC-3 TOOK OFF FROM HOUSTON EN ROUTE 01
TO BOSTON. CAPTAIN [REDACTED], IN COMMAND, HAD 8,500 FLYING HOURS. DURING THE 02
WAR HE HAD BEEN A LIEUTENANT COLONEL IN THE AIR TRANSPORT COMMAND. FIRST 03
OFFICER [REDACTED] WHO LATER MADE CAPTAIN, ALSO WAS A VETERAN. HE HAD FLOWN 04
B-29-S. 05

AT 2.45 A.M. ON THE 24TH, THE DC-3 WAS TWENTY MILES WEST OF MONTGOMERY, 06
ALABAMA, FLYING IN BRIGHT MOONLIGHT. SUDDENLY, A ROCKET-SHAPED OBJECT, 07
BRILLIANTLY LIGHTED, CAME RACING ALONG THE AIRWAY. 08

IT FLASHED TOWARD US AT TERRIFIC SPEED, [REDACTED] SAID LATER. *I VEEERED TO 09
THE LEFT. IT VEEERED SHARPLY, TOO, AND PASSED ABOUT SEVEN HUNDRED FEET TO THE 10
RIGHT. IT WAS ABOUT ONE HUNDRED FEET LONG, CIGAR-SHAPED, AND WINGLESS. IT 11
WAS TWICE THE DIAMETER OF A B-29.* 12

AS THE STRANGE OBJECT WENT BY, BOTH PILOTS SAW IT WAS DOUBLE-DECKED, WITH 13
TWO ROWS OF WINDOWS OR PORTS. PROTRUDING FROM THE NOSE WAS SOMETHING LIKE A 14
RADAR POLE. 15

A GLOW LIKE A BLUE FLUORESCENT LIGHT SHONE FROM INSIDE, SAID CAPTAIN 16
[REDACTED] THOUGH HE COULD SEE NO OCCUPANTS, HE FELT THAT THE MYSTERY OBJECT WAS 17
INTELLIGENTLY CONTROLLED. *JUST AS IT WENT BY,* HE REPORTED, *THE PILOT 18
PULLED UP AS IF HE HAD SEEN THE DC-3 AND WANTED TO AVOID US. THERE WAS A 19
TREMENDOUS BURST OF FLAME FROM THE REAR. IT ZOOMED INTO THE CLOUDS, ITS JET 20
WASH ROCKING OUR DC-3.* 21

[REDACTED] ESTIMATED THE UFO-S SPEED AT FIVE HUNDRED TO SEVEN HUNDRED MILES AN 22
HOUR. BOTH HE AND [REDACTED] AGREED THE EXHAUST WAS A RED-ORANGE FLAME, THIRTY 23
TO FIFTY FEET LONG. 24

PASSAGE OF THE STRANGE OBJECT WAS OBSERVED BY THE ONLY PASSENGER WHO WAS 25
AWAKE -- [REDACTED], ASSISTANT MANAGING EDITOR [REDACTED] 26
[REDACTED] IN THAT SWIFT GLIMPSE, [REDACTED] SAW NO DETAILS, BUT A CREW 27
CHIEF AT ROBINS AIR FORCE BASE, MACON, GEORGIA, CONFIRMED THAT A HUGE WINGLESS 28
OBJECT MATCHING THE PILOTS' DESCRIPTION HAD RUSHED ACROSS THE BASE THAT SAME 29
NIGHT. 30

FLYING FLOOR LAMP? *Journal*

Everybody Seeing Speedy Sky Bogey

By CHARLES POU

Is that Thing no more than a wayward floor lamp? Mrs. Noah Atkinson, of Brookhaven, saw it. And what did that Thing look like?

"A great big floor lamp, all lit up. Oh, it was beautiful!"

And C. M. Bowles, an Exposition Mills painter who lives near the Municipal airport, Sunday night, saw a "huge, brilliantly lighted object" streaking over Atlanta skies at maybe 30,000 feet. Mr. Bowles thinks the Thing was straight from Moscow.

Two Eastern Air Lines pilots first were startled by the newest astronomical "what-is-it" near Montgomery early Saturday. To them, it was "a wingless craft, spurting flame like a Buck Rogers rocket ship." Elsewhere, all over the country, that Thing was variously identified as:

What It Looked Like

1. An aluminum covered balloon.
2. A ball of fire.
3. An unusually bright light.
4. A red and blue flame that burst in mid-air.
5. A flash of cherry red fire.
6. A meteor.

Mrs. Atkinson kept her Flying Floorlamp secret three weeks. But she knew she wasn't seeing things when she saw the Thing.

She and her husband, who also saw it, kept mum. The story really sounded a little silly until the two Eastern pilots saw their Thing gamboling and fire-breathing through air-line skies early Saturday morning.

Pretty and Fast

After that, she decided her tale could be told:

"My husband and I were sitting on our front porch the night of July 5, and at a quarter to 9 o'clock we saw this Thing. Our front porch doesn't have a screen, and we were sitting near the edge where we could see good.

"I saw it first. It was not high up—about 200 feet, I guess, but it looked like it was right above the treetops. 'Looka there', I yelled to my husband, and he saw it too.

"It looked like the top part of a floor lamp, and it was the prettiest thing I ever saw. It came and passed so quick—I guess it must have been 500 miles an hour or faster."

And how about the two air-line pilots, C. M. Bowles and John E. Whitted, of Atlanta?

Well, they took off today, armed with a camera. And they hope to bring back a picture of that Thing.

Strange Things Observed In The Sky Again

"Buck Rogers" Craft Seen In Alabama

By R. DEWITT MILLER

LOS ANGELES, July 25.—(UP)—Strange things in the sky again! This time something that looks like a gigantic Buck Rogers space rocket traveling between 500 and 700 miles an hour over Alabama.

Only a year ago there was the famous "flying discs" uproar. Since

then there have been numerous reliable reports of even stranger things in the sky. Now a detailed report by an airline pilot and co-pilot of this fantastic machine over Alabama.

In an article written exclusively for the United Press July 8, 1947, L. said there had been thousands of reliable reports during the last 150 years of strange things in the sky.

Here are some more recent reports in addition to the "flying saucers":

Oct. 14, 1946—San Diego, Calif.—A strange, fantastic craft was reported maneuvering through the moonlit sky. One witness described it as "shaped like a bullet, leaving a thin trail of vapor behind."

Wilmington, O., Jan. 8, 1948—The Clinton county air base issued an official report on something in the sky seen by army personnel and thousands of civilians. It was described as "a flaming cone trailing a gaseous green mist."

Louisville, Ky., Jan. 8, 1948—A national guard flyer lost his life while chasing a wierd object in the sky.

I could cite 50 similar cases during the last two years.

Now comes the startling report of a "space rocket" with windows—again traveling at high speeds and reported by an airline pilot and co-pilot who had ample opportunity for observation.

What are these strange things in the skies? Here are a few possibilities:

1. Army experimentation—possibly, but it doesn't seem reasonable that the army would allow top-drawer secret weapons to wander over the country fouling up commercial airline routes.
2. The product of some strange group of super scientists working in a secluded Shangri-La—an outside possibility, but it would be almost impossible to conceal the manufacturing facilities necessary.
3. Space ships from Mars, or somewhere else beyond this earth. This is a distinct possibility. Our scientists inform us that we may soon build space rockets, so why shouldn't beings on some other world beat us to it?
4. Objects out of other dimensions of time and space. This seems fantastic, but science has recently discovered startling facts about the possibility of unknown dimensions of time and space.

Airline Pilots See "Sky Monster"

ATLANTA, Ga., July 25.—(UP)—Two Eastern Air Line pilots who reported seeing a huge flame-shooting Buck Rogers sky monster near Montgomery, Ala., yesterday maintained stoutly today that what they saw was a "man-made gadget."

They said they will be flying the same route again this week and this time they'll be armed with still and movie cameras in case the giant craft turns up again.

TODAY'S WEATHER

CINCINNATI AND VICINITY: Increasing cloudiness and warmer with scattered thundershowers; high about 90; clearing and cooler tonight.

MONDAY MORNING

Two Fliers Cling To Story Of Observing Sky Monster

BOTH AIRMEN

Scoff At Theory

It Was Meteor, Comet Or Army Balloons

Giant Sighted Over South Described As "Gadget" Made By Man.

Atlanta, Ga., July 25—(UP)—Two Eastern Air Line pilots who reported seeing a huge flame-shooting Buck Rogers sky monster near Montgomery, Ala., yesterday maintained stoutly today that what they saw was a "man-made gadget."

They said they will be flying the same route again this week and this time they'll be armed with still and movie cameras in case the giant craft turns up again.

Capt. C. S. Chiles, Atlanta, and Co-Pilot John Whitted, Hapeville, Ga., claimed they saw the saucer-like, wingless affair four times the circumference of a B-29 fuselage, on a routine flight from Houston, Tex., early yesterday morning.

Today they refused to let skeptics shake their story. They denied suggestions that it might have been a meteor or comet, or an Army radar observation balloon.

SCOFFS BALLOON THEORY.

Whitted, an Air Force pilot during the war with the rank of First Lieutenant, said he had worked with radar equipment overseas and the idea that the monster was a balloon was "fantastic."

Chiles agreed. He was an Air Force Lieutenant Colonel during the war, he said, and declared that "it was definitely not a balloon."

Chiles was also sure that it was not a meteor or comet. "It was a man-made gadget," he said, "and it was definitely jet-propelled." The clearest thing he saw, Chiles said, were two rows of windows, each about the size of "house-windows."

"The windows were all lighted up from inside," he said, "either by electricity or possibly by jet fuel burning inside. That's why they were so easy to see."

"You could see right through the windows and out the other side," Chiles said. Neither pilot reported any sign of life aboard the "monster."

WITHIN 750 FEET.

Both agreed that they passed the ship within 750 feet and that they got about a 15-second glimpse of it.

They will leave here tomorrow on the same flight for Houston. On the way back, early Wednesday morning, they will pass over the spot where they saw the monster," Chiles said. He is a camera enthusiast and plans to take along a movie camera and also a still camera.

Chiles said he had a camera along when they spotted the monster Saturday but that it was back in the ship and they couldn't get to it in time.

Only one of the plane's passengers aboard was awake at the time and he saw a "continuous light" at the time the pilots reportedly saw the craft. He was C. L. McKelvie, Columbus, Ohio. Chiles said he learned later that McKelvie also had a camera, on a strap around his neck, but he didn't have time to use it.

133

Flame-Shooting Wingless Plane Reported Met in Alabama Skies

By The Associated Press.

ATLANTA, July 24.—Two Eastern Air Lines pilots said they met a wingless two-deck plane early today southwest of Montgomery, Ala. They said the strange ship, shooting red flames and with a blue glow underneath the fuselage, passed the E. A. L. ship at 5,000 feet, headed toward New Orleans. The pilots said the stranger looked like a "Buck Rogers rocket ship."

The two pilots—Captain C. S. Childs and Co-pilot J. B. Whitted—were flying the Houston-to-Atlanta-to-Boston run. They left Houston, Tex., at 8:30 o'clock last night. They sighted the strange craft at 2:45 o'clock this morning, twenty miles southwest of Montgomery.

After reaching Atlanta at 3:49 a. m. they told of their strange experience. Captain Childs said they first sighted the object up ahead when nearing Montgomery.

"It was in line almost with our flight," he said. "We veered off to the left and this object turned to its left. When it came nearer to us, within better sight, its fuselage appeared to be about 100 feet in length and about four times the circumference of a B-28 fuselage.

"It had two rows of windows, an upper and a lower. They were square. Out of the rear of the ship red flames were shooting twenty-five to fifty feet. There was a blue glow underneath the fuselage. The ship appeared to be doing between 500 and 700 miles an hour, heading toward New Orleans.

"When it got alongside of us it pulled up with a tremendous burst of flame out of the rear. The flames were so bright they blinded us for a second. Then the ship disappeared into the broken clouds. The moon was shining intermittently and the ship could be seen for a few seconds and would then be obscured. The ship had no wings. It seemed to have an upper deck and a lower deck and was fully lighted inside. We saw no occupants."

Of the twenty passengers Captain Childs said only one was awake and saw the queer ship.

The third saucer classic did not involve a saucer at all, but a "wingless aircraft, 100 feet long, cigar-shaped and about twice the diameter of a B-29." It was sighted the night of July 21, 1948, near Montgomery, Ala., by C. S. Childs and J. B. Whitted, pilots of an Eastern Airlines plane. The underside of the thing had a "deep blue glow," there were "two rows of windows from which bright lights were glowing, and it had a 50-foot trail of orange-red flames." Only one passenger of the flight was awake at the time. He saw only "a trail of fire."

On the basis of later experience, the project was fairly sure that this was a meteor. At about the same time, a plane flying between Blackstone, Va., and Greensboro, S. C., reported independently that it had seen a "bright shooting star" in the direction of Montgomery.

The science-fiction boys, of course, converted the Childs-Whitted-Something into another "mother ship." It was in sight for only a few seconds, was seen by only three people, and then vanished into the black night. But it flies on endlessly in the pages of saucer lore, a transport from outer space packed to the gunwales with flying disks.

Flame-Spitting Aerial Monster Rocked Their DC-3, Pilots Report

ATLANTA, July 24 (UP).—Two pilots of Eastern Air Lines today announced they had encountered a giant, wingless, flame-throwing aircraft straight out of Buck Rogers. Capt. Charles Shipe Chiles and John B. Whitted, his co-pilot, corroborated each other's report of the fantastic plane.

They were flying in a DC-3 Eastern Airliner at 5,000 feet about 20 miles southwest of Montgomery, Ala., early today when the thing came at them, they said.

It looked like a B-29 "blown up about four times" and stripped of its wings.

It cast a light more vivid than lightning, they said. They saw two decks of big square windows and "it was a man-made thing, all right," they added. Capt. Chiles said:

"The first thing that came to my attention was the long

stream of flame coiling out of the rear end of the plane, or whatever it was.

"Then I noticed the two rows of square windows—we couldn't see any people aboard.

"The aircraft seemed to be about four times the circumference of a B-29 fuselage but it was only a little longer. There were no wings whatever.

"The plane passed us on our right, then, as if the pilot had seen us and wanted to avoid us, it zoomed up at 500 to 700 miles per hour into the same cloud it came out of. A 40-foot red

flame shot out its rear end.

"A luminous glow, like a giant fluorescent light, ran along the belly of the thing."

As the aircraft passed them, they said, their DC-3 fluttered in the "prop-wash, jet-wash or rocket-wash."

"It sent out tremendous shock waves," he added.

Chiles and Whitted said 20 passengers were aboard their plane but all were asleep except C. L. McKelvie of Columbus, O. They said McKelvie's story jibed with theirs when they talked about it later.

The EASTERN AIR LINES CASE

PROJECT SAUCER CASE NO. 144

IN THE OFFICIAL REPORT OF THE STUDIES MADE BY AIR MATERIEL COMMAND, WRIGHT FIELD, DAYTON, OHIO IN ITS "PROJECT SAUCER," THIS CASE WAS TERMED THE MOST "FANTASTIC SAUCER SIGHTING IN TECHNICAL INTELLIGENCE RECORDS." ON JULY 24, 1948, AT 2:45 A.M., CAPTAIN C.S. CHILES AND FIRST OFFICER JOHN B. WHITTED WERE FLYING NEAR MONTGOMERY, ALABAMA, WHEN A BRILLIANT, CIGAR-SHAPED CRAFT CAME HURTLING TOWARD THEM.

GOOD LORD! LOOK!

WHAT IN THE WORLD IS THAT?

"WHATEVER IT WAS," CAPTAIN CHILES LATER TOLD PROJECT SAUCER INVESTIGATORS, "IT FLASHED DOWN TOWARD US (HEADING SOUTHWEST)... A WINGLESS AIRCRAFT, 100 FEET LONG, CIGAR SHAPED, AND ABOUT TWICE THE DIAMETER OF A B-29 WITH NO PROTRUDING SURFACES..."

"...WE VEERED TO OUR LEFT. IT VEERED TO ITS LEFT AND PASSED US ABOUT 700 FEET TO OUR RIGHT AND ABOVE US..."

IT'S COMING RIGHT AT US! VEER OFF OR WE'LL HIT IT!

WHEW!

ALL STATEMENTS IN QUOTES ARE OFFICIAL VERBATIM RECORDS AS PRINTED IN THIS OFFICIAL REPORT--EDS...

AIR INTELLIGENCE INFORMATION REPORT

Tech Intelligence Div
Intelligence Department
Wright-Patterson AFB, Dayton, Ohio

102-122-79

PAGE 3 5

(3) Incident #3 (Continued)

Although the dates seem to indicate that this sighting could not be the same as that described in Incident 1, yet the major portion of this testimony refers to a "blue white light". Observations in the first instance describe a "blue glow" running the entire length of the fuselage. When viewed from the ground it is logical to assume that the blue glow would be mostly visible.

NOTE: In this connection, Dr. Josef Allen Hynek, astro-physicist, OSURF, who is presently to serve as consultant on this project, has advised that it is possible for a celestial body to appear to travel in a straight line and slant downwards. (It is extremely improbable, although aerodynamically possible, for some objects to achieve an effect of lift through the forces generated during their flight through the atmosphere). It is his further opinion that it is impossible for any celestial body to maneuver violently and make sharp turns. It is extremely unlikely for heavenly bodies to appear to move slowly when passing through the lower layers of the atmosphere, but, from greater distances, it is possible to observe far-distant bodies for extended periods of time. Objective size is contingent upon (1) distance of the heavenly body from the earth and (2) its mass. The manner of disappearance of a meteor is like a light suddenly blinking off.

(4) Incident #4

Incident #3?

Object #4 was observed by Mr. and Mrs. [redacted] Mrs. [redacted], Mrs. [redacted] and Mr. [redacted] between the hours of 2045 and 2050, 26 July 1948, at Mablee, Georgia and Augusta, Georgia. Description of this object seems to indicate that it was a meteor. Five of the observers said that the object was "football shaped"; that it appeared to be a green light with a silvery tail and that it observed level flight. The last observer stated that the speed was "10,000 to 20,000 mph" and that "it appeared to be 1/4 the size of a full moon", and that "it was a multi-colored, brilliant light trailing burning fragments". The terrific speed together with the description of a multi-colored light trailing burning fragments seems to establish this object as a meteor.

3. COMMENTS:

1. The only incident which possesses absolute intelligence significance is Incident #1. It is obvious that this object was not a meteor. There has been no evidence to suggest any findings of unreliability, nor have there been any major inaccuracies on the part of the witnesses.

2. Weather reports establish areas of visibility as stated in the observers' reports.

3. Available information from Ordnance, Army, Navy and AF Weather Bureaus, Research Organizations, and others, failed to reveal any evidence of testing devices to which the object could be attributed.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50 U.S.C. 1831 AND 1832. TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. IT IS TO BE CONTROLLED IN WHOLE OR IN PART BY OTHER THAN UNITED STATES AIR FORCE AGENCIES, EXCEPT BY PERMISSION OF THE AIR FORCE.

UNCLASSIFIED

CHILES THEN WENT ON TO DESCRIBE THE OBJECT. HE SAID THE CABIN "APPEARED LIKE A PILOT COMPARTMENT, ONLY BRIGHTER." HE SAID THE ILLUMINATION INSIDE APPROXIMATED THE BRILLIANCE OF A MAGNESIUM FLARE. "WE SAW NO OCCUPANTS. FROM THE SIDE OF THE CRAFT CAME AN INTENSE, FAIRLY DARK BLUE GLOW THAT RAN THE ENTIRE LENGTH OF THE FUSELAGE... LIKE A BLUE FLUORESCENT FACTORY LIGHT..."

"THE EXHAUST WAS A RED-ORANGE FLAME," CHILES SAID IT EXTENDED 30 TO 50 FEET BEHIND THE OBJECT. "THEN," CHILES CONTINUED, "AS IF THE PILOT HAD SEEN US AND WANTED TO AVOID US, IT PULLED UP WITH A TREMENDOUS BURST OF FLAME FROM THE REAR..."

"... AND ZOOMED INTO THE CLOUDS, ITS PROP WASH OR JET WASH ROCKING OUR DC.3..."

THIS SAME "SPACE SHIP," THE REPORT STATED, WAS ALSO "SEEN BY GROUND OBSERVERS AT ROBBINS AIR FORCE BASE, MACON, GEORGIA (APPROXIMATELY ONE HOUR EARLIER) GOING IN A SOUTHERLY DIRECTION, TRAILING VARIED-COLORED FLAMES..."

THE REPORT THEN WENT ON TO APPLY THE PRANDTL THEORY OF LIFT TO THE INCIDENT, INDICATING THAT "A FUSELAGE OF THE DIMENSIONS REPORTED BY CHILES AND WHITTED COULD SUPPORT A LOAD COMPARABLE TO THE WEIGHT OF AN AIRCRAFT OF THIS SIZE AT FLYING SPEEDS IN THE SUB-SONIC RANGE. THE REPORT THEN CONCLUDED...

"THE OBJECT IS STILL CONSIDERED 'UNIDENTIFIED.'"

THIS "PROJECT SAUCER REPORT" WAS MADE ON APRIL 27, 1949. YET IN DECEMBER OF THAT SAME YEAR, MAJOR JERE BOGGS, A PROJECT INTELLIGENCE OFFICER, STATED TO THE INTERNATIONAL NEWS SERVICE...

CHILES AND WHITTED SAW A METEOR... A BOLIDE...

WHY DID PROJECT SAUCER CHANGE ITS MIND?

Pilots See Huge "Mystery Aircraft" Over South

ATLANTA, Ga., July 24.—(UP)—Two Eastern Airlines pilots reported that their plane last night passed a tremendous, wingless aircraft that shot a 40-foot flame out its back end and traveled between 500 and 700 miles an hour.

Capt. Clarence Shipe Chiles and his co-pilot, John B. Whitted, told of seeing the fantastic airship and said it looked like a B-29 fuselage "blown up about four times."

The aircraft was brilliantly lit and had two decks of big square windows, they claimed. It passed within several hundred feet of the pilot's DC-3 and then shot up in the clouds, they said.

Cruising At Time

"We were cruising about 20 miles southwest of Montgomery, Ala.," said Captain Chiles, who was an ATC ferry pilot for four years during the war.

"We looked out the rightside of the cockpit and saw a tremendous light. The first thing that came to my attention was the long stream of flame coming out of the rear end of the plane, or whatever it was."

"Then I noticed the two rows of square windows—it was a man-made thing, all right. We couldn't see any people aboard. It was traveling too fast for that."

"The plane passed us on the right, then, as if the pilot had seen us and wanted to avoid us, it zoomed up into the same cloud it came out of. A 40-foot red flame shot out its rear end. A luminous glow like a giant fluorescent light ran along the belly of the thing."

Whitted, who said he had seen the Air Force's best jet planes not on the secret list, estimated its speed as much faster than he had seen before.

"500 To 700"

"I'd say that when it shot up into the clouds it was going between 500 and 700 miles an hour," Whitted said.

As the aircraft passed them, they said, their comparative small DC-3 "tattered in the prop wash, jet wash or rocket wash," the pilots said. "It sent out tremendous shock waves."

The brilliant light of the airship "blinded" the pilots, they said. "The bright flame of its propellant engine, lighting blindness to our cockpit," the pilots said.

The eastern plane was en route Atlanta. The mystery ship appeared headed toward Mobile or New Orleans, the pilots said.

PLANES IN THE NEWS—NAVY'S CONSTITUTION—Patuxent, Md., July 26.—The Navy's largest airplane, the 92-ton Lockheed Constitution, taxis into the Naval Air Station after a 2600-mile flight from Moffett Field, Cal. Average speed for the huge plane was 260 miles per hour, and this was the first time the ship had landed outside California. For other planes in the news, see two photo below. (AP Wirephoto)

Atlanta Pilots Report Wingless Sky Monster

By ALBERT RILEY

Two Atlanta pilots of the Eastern Air Lines have baffled the nation with a bizarre story of a huge, wingless, flame-shooting, double-decked aircraft they said flashed past their DC-3 airliner at 2:45 a. m., yesterday morning about 20 miles southwest of Montgomery, Ala.

The two fliers, Capt. Clarence Shipe Chiles and his co-pilot, John B. Whitted are puzzled themselves at what they saw 5,000 feet over Alabama.

"If you look at one of those fantastic Flash Gordon rocket ships in the funny papers, you've got a picture of what we saw," said Whitted.

Nearly four times larger than a B-29, it resembled a B-29 fuselage with the wings off, Chiles said, and flames were shooting out of the tail 35 to 40 feet.

Traveling at a speed they estimated at between 500 and 700 miles an hour, the mysterious aircraft was brilliantly lighted with two decks of windows. Underneath, on the belly of the ship, they said there was a sort of blue fluorescent glow.

Flying a northeasterly course on a scheduled flight from Houston, Texas, via New Orleans, to At-

lanta, the two pilots saw the strange object whiz past them in a southwesterly direction, toward Mobile and New Orleans.

Both pilots, who served as Army fliers during the war; said they

had never seen anything before that even faintly resembled the mystery craft, and they had no idea what it could have been.

Neither Army nor CAA officials could throw any light on the mys-

tery, and an Air Force spokesman at Washington said that "obviously" this country has no plane resembling a double-decked, jet-propelled, wingless transport shooting a 40-foot, flame out of its back end.

The pilots said there were 20 passengers aboard their plane, but all were asleep except one man, C. L. McKelvie, of 85 Hanelton Pike, Columbus, Ohio. McKelvie, said Chiles, told the pilots that he also saw the mystery aircraft.

"It was a moonlit night with some clouds," Chiles said, "and we were flying along on the regular airway, when we saw ahead and slightly above and to our right what appeared to be a tremendous jet of flame.

"We asked each other, 'What in the world is this?'

"It flashed down and we veered to the left and it veered to its left, and passed us about 700 feet to our right and about 700 feet above us.

"Then, as if the pilot had seen us and wanted to avoid us, it pulled up with a tremendous burst of flame out of its rear and and zoomed up into the clouds. Its prop-wash or jet-wash rocked our DC-3."

The pilots said they saw two rows of square windows on the craft, and Whitted said he counted six windows, but could see no occupants because the ship was going too fast.

"It was a man-made thing all right," they said.

The light of the plane and its jet flames was so bright it almost gave them "lightning blindness," they said, and they had to turn up their instrument panel lights in their cockpit.

"After it passed us," Chiles said, "we must have sat there for five minutes without saying a word, we were so speechless."

They reported by radio what they had seen and their message went to Maxwell Field at Montgomery, and to Lawson Field at Fort Benning, and to CAA offices, the pilots said. They told about it again when they landed at Atlanta, they said, but everyone was incredulous.

Chiles and Whitted both said they were certain it was not a meteor or comet, because they had seen them before in the air.

DESCRIBE MYSTERIOUS "PLANE"—Co-Pilot John B. Whitted (left) and Pilot, Clarence Shipe Chiles, of an Eastern Air Lines DC-3, tell Lockwood Doty, WCON News Director, how they saw a huge, strange, jet-propelled, double-decker, wingless aircraft whiz past them early yesterday morning near Montgomery, Ala.

"As a B-29 bomber pilot during the war, I saw some strange things over Japan," Whitted said, "but I never saw anything like that."

The United Press reported "no comment" from Maxwell Field authorities and from Capt. Eddie Wickenbacker, Eastern Air Lines President, at Jacksonville, Fla.

Air Force spokesmen at Washington suggested a possibility that the strange craft might have been a civilian version of the Boeing B-29 transport, reportedly undergoing tests now somewhere in the

Eastern Air Lines pilot said this craft has its wings connected far back on the fuselage and this might confuse an observer into thinking it was wingless. But the B-29 is propelled by conventional engines.

PILOTS' DRAWINGS OF MYSTERY CRAFT

Pilots Report Flaming, Wingless Rocket Ship

ATLANTA, July 24.—(AP)—A strange wingless plane shooting red flame "like a Buck Rogers rocket ship" was described today by two Eastern Airline pilots. They called it a double-decked speedster making 500 to 700 miles per hour.

The pilot, Capt. C. S. Chiles and Co-Pilot J. B. Whitted, said they were flying the Houston-Atlanta-Boston run when they sighted the ship southwest of Montgomery, Ala., about 2:45 a. m. (CST).

"It was in line almost with our flight," Chiles said. "We veered off to the left and this object turned to its left. When it came near to us, its fuselage appeared to be about 100 feet in length and about four times the circumference of a B-29 fuselage.

"It had two rows of windows. Out of the rear of the ship red flames were shooting 25 to 50 feet. There was a blue glow beneath the fuselage. The ship appeared to be doing between 500 to 700 miles an hour, heading toward New Orleans.

"WHEN IT GOT alongside of us, it pulled up with a tremendous burst of flame out of the rear. Then the ship disappeared into the broken clouds. The ship had no wings. It seemed to have an upper deck and a lower deck and was fully lighted inside. We saw no occupants."

At Montgomery, Maxwell and Dannelly Army fields said they knew nothing about the report. The Civil Aeronautics Administration also said it had no information about the ship. The Air Force in Washington also could shed no light on the craft reported sighted over Montgomery, Ala., by two Eastern Airline pilots, was described by a Columbus, O., man today as "a flash of cherry red fire."

Clarence L. McKelvie, assistant managing editor of the American Education Press, said he was the only passenger on the Eastern Airlines Houston-Atlanta-Boston plane not asleep when the "continuous light" was sighted. "I was in shape at 10 p. m.," McKelvie said.

'Sky Devil-Ship' Scares Pilots; Air Chief Wishes He Had One

AIRCRAFT
Chiles (right).

Out at Santa Monica, Cal., the famous Gen. George C. Kenney, chief of the Strategic Air Command, was bearded in his den. His eyes twinkled. No, he said, cautiously, it wasn't one of his planes. The Army as yet hasn't got anything like the Thing seen over Montgomery.

Not Boeing Plane

"I wish we did," the general said wistfully. "I sure would have liked to see that Thing."

So said William M. Allen, president of the Boeing Aircraft Co., up at Seattle. "I'm pretty sure it wasn't one of our planes," said Mr. Allen, modestly.

Almost identical statements issued by the Army Air Forces at Washington and the United States Weather Bureau at Montgomery tended to throw some light on this fantasy. Both sources suggested that the Atlanta pilots had flown past an air radar weather observation balloon. Those things, they explained, are 10 feet in diameter and have square, tinfoil boxes fastened to them. The boxes reflect light and "give strange illusions" as they twist and turn. Maxwell Field said they send 'em up at six-hour intervals.

And Maxwell Field is at Montgomery.

Plane Makers Dubious About Alabama 'Thing'

By WILLIAM KEY

What was that Thing that scared the daylight out of two Atlanta Eastern Air Line pilots in the spooky hours Saturday morning?

Is there some stratospheric Loch Ness fire-breathing monster on the Milky Way run between Atlanta and New Orleans?

The pilots, Capt. C. S. Chiles, of Atlanta, and Co-Pilot J. B. Whitted, of Hapeville, would like to know. The Army Strategic Air Command would like to know. Big airplane manufacturers also are curious, but slightly dubious.

Pilots Chiles and Whitted told their thrilling story upon arriving at municipal airport here Saturday on the Houston-Atlanta-Boston run. Here is what they say they saw, near Montgomery:

A gigantic plane without wings, black against the night sky, streaking through the heavens at 5,000 feet altitude with a fiery comet's tail 25 to 50 feet in length. It had a 100-foot fuselage about four times the circumference of a B-29's, and two rows of brilliantly lighted square windows. Creepiest of all, it was a veritable Flying Dutchman of the Skies. Nary a living soul was seen aboard!

Continuous Light

The pilots admitted they had goose pimples riding pick-a-back on goose pimples. What's more, they said one of their 20 passengers—C. L. McKelvie, of Columbus, Ohio—was awake and saw the same thing.

Reporters nailed Mr. McKelvie at Kennett Square, Pa. How about it, they asked him—had he seen what the Atlanta pilots said he saw?

Well, now, said Mr. McKelvie—not exactly. He said he saw "no form of ship" whatever. He saw a "continuous light speed past" his window.

"But," added Mr. McKelvie, "I'm not used to seeing..."

Hunters Support Airmen's Story Of Flame-Shooting Wingless Craft

A flame-shooting, wingless mystery aircraft reported seen by two Eastern Air Lines pilots early Saturday morning was linked yesterday with a strange sight observed in the sky about the same time by an Atlantan who was fox-hunting near Covington.

J. V. Morris, of 1092 Wyley St., S. E., said he and a friend, Lindsay Fall, of 1309 Metropolitan Ave., S. E., were fox hunting around Snapping Shoals on the Yellow River about 3 a. m. Saturday when they saw "an unusually bright light—as bright as a

room," which appeared to be speeding westward. Morris said it was gone in a few seconds.

The time coincided with the hour the pilots, Capt. C. S. Chiles, and his co-pilot, John B. Whitted, said they saw the wingless "Buck Rogers" craft. They had reported seeing it at 2:45 a. m.

Meanwhile, Air Force, Coast Guard and civilian air officials, as well as plane manufacturers collectively declared they had never heard of anything like the leviathan Chiles and Whitted reported they saw on a night flight

from Houston, Texas, to Atlanta.

But the pilots were untroubled by the skeptics. They announced they planned to arm themselves with cameras as they prepared to take off on another round trip flight to Houston. If they see anything on this flight they hope to record their observations on film—as proof.

Hunters Abet Story Of Wingless Aircraft

A flame-shooting, wingless mystery aircraft reported seen by two Eastern Air Lines pilots early Saturday morning was linked yesterday with a strange sight observed in the sky about the same time by two Atlantans who were fox-hunting near Covington.

J. V. Morris, of 1092 Wyley St., S. E., said he and a friend, Lindsay Fall, of 1309 Metropolitan Ave., S. E., were fox hunting around Snapping Shoals on the Yellow River about 3 a. m. Saturday when they saw "an unusually bright light—as bright as a room," which appeared to be speeding westward. Morris said it was gone in a few seconds.

The time coincided with the hour the pilots, Capt. C. S. Chiles, and his co-pilot, John B. Whitted, said they saw the wingless "Buck Rogers" craft. They had reported seeing it at 2:45 a. m.

Hundreds of telephone calls flooded the Civil Aeronautics Administration office in Yakima, Wash., today from persons who had seen a silvery, "moon-sized" flying "blob" wheeling across the sky above the city.

The apparition, termed "another flying saucer" by the CAA, was observed by two control tower men at the Yakima Airport, both of whom agreed as to its general description.

Airport Traffic Controller Don

Hunt and Aircraft Communicator George Robinson said they saw a silvery "moon-sized" object wheeling west of the city about 2 p. m. (PDT) today. They saw it again at 4:20 p. m.

An Indianapolis, Ind., housewife meanwhile reported she and her son and daughter saw a similar flame-spurting aircraft Thursday night, more than 24 hours before it was seen by the pilots. She described it as a ball of fire which shot two jets of flame downward at regular intervals. She said she watched it about three minutes.

Meanwhile, Air Force, Coast Guard and civilian air officials, as well as plane manufacturers collectively declared they had never heard of anything like the leviathan Chiles and Whitted reported they saw on a night flight from Houston, Texas, to Atlanta.

But the pilots were undaunted by the skeptics. They announced they planned to arm themselves with cameras as they prepared to take off on another round trip flight to Houston. If they see anything on this flight they hope to record their observations on film—as proof.

Pilots Report Flaming, Wingless Rocket Ship

ATLANTA, July 24.—(P)—A strange wingless plane shooting red flame "like a Buck Rogers rocket ship" was described today by two Eastern Airline pilots. They called it a double-decked speedster making 500 to 700 miles per hour.

The pilot, Capt. C. S. Chiles and Co-Pilot J. B. Whitted, said they were flying the Houston-Atlanta-Boston run when they sighted the ship southwest of Montgomery, Ala., about 2:45 a. m. (CST).

"It was in line almost with our flight," Chiles said. "We veered off to the left and this object turned to its left. When it came near to us, its fuselage appeared to be about 100 feet in length and about four times the circumference of a B-29 fuselage.

"It had two rows of windows. Out of the rear of the ship red flames were shooting 25 to 50 feet. There was a blue glow beneath the fuselage. The ship appeared to be doing between 500 to 700 miles an hour, heading toward New Orleans.

* * *

"WHEN IT GOT alongside of us, it pulled up with a tremendous burst of flame out of the rear. Then the ship disappeared into the broken clouds. The ship had no wings. It seemed to have an upper deck and a lower deck and was fully lighted inside. We saw no occupants."

At Montgomery, Maxwell and Dannelly Army fields said they knew nothing about the report. The Civil Aeronautics Administration also said it had no information about the ship. The Air Force in Washington also could shed no light on the craft.

KENNETH SQUARE, Pa.,
July 24.—(P)—A mystery plane,

reported sighted over Montgomery, Ala., by two Eastern Airline pilots, was described by a Columbus, O., man today as "a flash of cherry red fire."

Clarence L. McKelvie, assistant managing editor of the American Education Press, said he was the only passenger on the Eastern Airlines Houston-to-Boston plane not asleep when the phantom craft was sighted.

"I saw no shape or form," McKelvie said.

These facts alone—the occurrence of scheduled showers and the number of well-plotted meteors observed during the period—point strongly to the probability that the Chiles-Whitted UFO was a meteor. The probability becomes virtual certainty when we examine the available records for the night of July 23 and morning of July 24, the period when this particular UFO appeared. The watcher in Alabama was not on duty; but another observer in Iowa counted fourteen meteors in one hour [23], more than double the rate for an average night. About an hour before the UFO appeared in Alabama, ground observers at Robins Air Force Base near Macon, Georgia, reported an unusually bright meteor going from north to south. A few minutes before the Alabama sighting, two Air Force officers flying between Blackstone, Virginia, and Gainsborough, North Carolina, reported an unusually bright meteor traveling in a southerly direction.

When Chiles and Whitted observed their UFO, its appearance and manner of motion were identical with those of many other bright meteors but the pilots, startled by the sudden apparition, misinterpreted what they saw. They probably overestimated the length of time the meteor was in view and they almost certainly underestimated the distance. Meteors notoriously mislead even the experienced observer, who often sees them disappearing "just behind the next hill," although they may actually be fifty or a hundred miles away. Although the night was moonlit and clear except for broken clouds, the witnesses had no fixed reference point by which to determine either distance or size.

There can be no doubt that Chiles and Whitted misinterpreted the appearance of an unusually brilliant meteor, its body glowing to white (the momentarily persisting luminous train of a meteor often has a veined or fibrous structure that could easily have suggested the "lighted window" and "cockpit") and blue incandescence (the glowing "undercarriage") as it rushed through the atmosphere some fifty miles or more away, shooting off flaming gases (the "exhaust") and vaporizing from the friction of the atmosphere. Flashing beyond their range of vision ("pulling up into the clouds"), it probably burned and disintegrated before it reached the earth.

This fresh analysis, based on meteor records for July 1948, has led ATIC finally to remove the Chiles-Whitted UFO from the category of Unknowns and, as Dr. Hynek suggested originally, add it to the file of recorded meteors.

Galley 45—THE WORLD OF FLYING SAUCERS

check of the air traffic showed that no other planes had been in the area at the time, so the object could not have been a normal aircraft. Furthermore, other equally reliable witnesses reported seeing unusually bright meteors in the Southeast that night. Since the bare physical description of the UFO, apart from the inferences made, was identical with that of a fireball, Dr. Hynek concluded that it was an unusually bright meteor.

But the climate at ATIC that summer was not friendly to a prosaic explanation. Remembering the tragic death of Captain Mantell some six months earlier while he was chasing a UFO, still unidentified (p. 60), some officials were more than half ready to believe in invading space fleets as the answer to every puzzling phenomenon in the sky. They rejected the fireball explanation. Instead of accepting the Chiles-Whitted UFO as a meteor, they identified the other two meteors seen that night as UFOs!

And yet the evidence is overwhelming that the UFO *was* a fireball.

The major meteor showers that occur on schedule every year have accounted for hundreds of alleged UFOs over the last fifteen years. Several of these showers begin in mid-July and July 24 falls in a period of greatly increased meteor activity, when the earth is moving through the Aquarid streams and is encountering the forerunners of the Perseids. All during the year, and particularly during these weeks of shower meteors, amateur astronomers all over the country spend many evenings watching the sky, counting meteors, mapping their paths, and reporting the data to various observatories. On an average night outside the shower periods, if there are a few clouds and no moon, an experienced watcher may count about half a dozen meteors in an hour's time, but during a shower he usually sees many more. For the week of July 23 to 30, 1948, the records of the American Meteorities Society, the Harvard College Observatory, and the Flower and Cook Observatory show that, in spite of the interference of a bright moon, large numbers of meteors were counted and the paths of many of them were mapped and plotted.

The reports from the Southeast for that week have particular interest for the Chiles-Whitted case. A regular observer in Alabama counted fifteen meteors in one hour's watching on the evening of July 24, and twenty-one in two hours the following night [23]. On the evening of July 26 he apparently took a holiday, but many other persons saw a huge fireball that flashed over North Carolina and Tennessee at 9:36 P.M. E.S.T.; its radiant (AMS 2322), plotted from many reports, showed it to be a member of the Delta Aquarid stream, then approaching its maximum. Early on the morning of July 27 another fireball soared over Tennessee and apparently exploded [24]. On the night of July 28 the Alabama watcher recorded fifteen meteors, from which he obtained the radiants AMS 3269, 3270, and 3271 [9, p. 521].

wash or mechanical disturbance when the object passed. The third witness, the passenger, did not report any turbulence or rocking of the plane. Some of the later versions of the incident gloss over these facts, however, and thus exaggerate the startling nature of the sighting. One account subtly implies the presence of a pilot in the UFO [22] and several state that, as the object passed, the plane hit turbulent air [7, p. 61] or was "rocked" by the UFO [20, p. 21].

Like most eye-witness descriptions of a startling event, the testimony of the three men differed. Chiles stated that at the front of the UFO was a lighted pilot compartment or cockpit with a "snout" similar to a radar pole, and that a kind of nozzle projected from the rear from which the flames fanned out to a width of some twenty to thirty feet. Whitted did not see a cockpit, a snout, or a rear nozzle; he thought the flames flared out from the entire rear and were never any wider than the width of the UFO itself. The third witness, the passenger, saw no shape or form, only an intensely brilliant streak of light that appeared and vanished before he was able to focus his eyes. As responsible officers, both pilots had obviously tried to separate the observed phenomena from their interpretation. They differed widely on the estimated distance of the UFO (the passenger did not offer an estimate). Chiles thought it passed them with a margin of only about 700 feet, but Whitted believed the distance to be more than ten times greater, about a mile and a half. However, when we remember that these men had the UFO in sight for only a small fraction of a minute and that their study of the side view ("windows," "cockpit," etc.) must have been limited to the instant of passing, these disagreements are not remarkable.

When Captain Chiles and Lieutenant Whitted reported their frightening experience, the Air Force made a prompt investigation. Since Captain Chiles explicitly stated his belief that the UFO was under intelligent control, the case required careful consideration. A

The Chiles-Whitted Sighting

The Chiles-Whitted UFO, sighted on July 24, 1948, is one of the most publicized of the classics. Although the object appeared, passed, and vanished in an interval of roughly ten seconds, and the descriptions given by the three witnesses differed on several vital points, Dr. J. Allen Hynek, astronomer consultant to ATIC, in his report of April 30, 1949, identified it as an undoubted meteor. Nevertheless, as late as 1960, apparently not all Air Force officials had accepted this solution [20]. The literature of saucerdom still cites the incident as indisputable proof of alien spaceships [19, pp. 78, 88].

On the evening of July 23 an Eastern Airlines DC-3 took off from Houston, Texas; en route for Boston, with an experienced pilot and copilot in the cockpit. By 2:40 A.M. C.D.S.T. July 24 the plane was a few miles southwest of Montgomery, Alabama, flying at an altitude of 5000 feet. The night was clear, and a bright moon just four days past full shone through a layer of broken clouds about 1000 feet above the plane. At 2:45 A.M. the pilot, Captain C. S. Chiles, noticed a dull red glow some distance ahead, approaching from a little above and to the right of the plane. He remarked to his copilot, Lieutenant J. B. Whitted, "Look, here comes a new Army jet job." [18] In the next few seconds, however, he changed his mind about the identity of the object. As both men watched, the brilliantly glowing unknown continued to approach with incredible swiftness, apparently on a collision course; it seemed to veer slightly, passed the plane on the right almost level with and parallel to the flight path, then seemed to pull up sharply and disappear into the clouds. Captain Chiles estimated that the object was in sight for about ten seconds. The one passenger who was awake, sitting at the right of the cabin, saw the light for only an instant as it flashed by.

The brief impressions of these three witnesses were the sole foundation for newspaper stories that the plane had narrowly escaped collision with a spaceship.

In their official report both pilots agreed on the general appearance of the UFO: it looked like a wingless aircraft with no fins or protruding surfaces, was cigar-shaped, about 100 feet long, and about twice the diameter of a B-29 superfortress. It seemed to have two rows of windows through which glowed a very bright light, brilliant as a magnesium flare. An intense dark-blue glow like a blue fluorescent factory light shone at the bottom along the entire length, and red-orange flames shot out from the rear to a distance of some fifty feet. Neither man heard any sound and neither saw any occupants. In their original report to ATIC both men agreed that "no disturbance was felt from the air waves, nor was there any prop

PAGE 4 OF 5 PAGES

4. Apparently it is not of domestic origin since a thorough check of 225 flight schedules, both commercial and governmental, revealed that in only one instance did the reported flight paths cross. (See chart inclosed as Exhibit "1"). This single exception was the flight in a northwesterly direction of a C-47 enroute Robins AF Base to Olmsted Field, Pa. Its time of departure would have enabled it to have passed through the approximate areas on the 24 July 1948 where the sightings were reported. However, the factors of speed, direction of flight, maneuvers, configurations, lights and other factors rule out this one possibility.

5. Objects similar in configuration have been reported as follows:

- a. Rocket-like objects capable of immense speed were seen during the past summer in broad daylight in Denmark, Norway and Sweden.
- b. A wingless aircraft was observed moving at high speed at Obrechtstreet, Arnheim, The Hague, Holland. The object was seen intermittently through clouds and was reported to have two decks.

6. Flying Fuselages (Torpedo or Cigar-Shaped Body)

a. While the cigar or torpedo shaped body represents an efficient form for the fuselage of an airplane or the body of a guided missile, in neither case has it been used as a primary lift producing surface. However, an extension of the Prandtl theory of lift indicates that a fuselage of the dimensions reported by the Eastern Airlines pilots [redacted] and [redacted] in the Montgomery, Alabama, incident could support a gross weight of approximately 12,000 pounds at an arbitrarily chosen stalling speed of 150 miles per hour, conservatively estimated. The Prandtl theory probably gives very conservative values of maximum lift for bodies of this shape. If a lift coefficient twice as great were used (such a value has been given by a German scientist from memory of his wind tunnel researches in Germany), a gross weight of 24,000 pounds could be supported at the assumed stalling speed.

b. Although the craft sighted by Whitted and Chiles was reported to be without wings or fins, it is possible it could have been equipped with extensible wings for take-off and landing, contained within the fuselage. In such a case a wing span of nearly 90 feet would be possible. If an aspect ratio of 5 were used (18 ft. mean aerodynamic chord), and if the wing design incorporated slots and flaps, the wing could support 115,000 pounds at a stalling speed of 150 mph. It is possible that the fuselage could also contribute lift with this arrangement, depending upon the incidence of the wing. This type of aircraft could also be partially supported in the take-off and landing condition by the vertical component of the jet thrust, if the landing and take-off took place with the fuselage axis, or the jet stream direction in a vertical or nearly vertical attitude. The further possibility that an extensible rotor, concealed within the fuselage, could have been used, would provide another method for landing and take-off that would allow wingless flight at very high speed. Such a design could result in a relatively large duration of flight and corresponding range.

c. While no stabilizing fins were apparent on the "flying fuselage" reported by [redacted] and [redacted] it is possible that vanes within the jet, operated by a gyroserve system could have provided static stability, longitudinally, directionally and laterally. The same vanes could also have been used for accomplishing static balance or trim, as well as control for maneuvering. A cigar-shaped body of the type reported with the center of gravity sufficiently far forward and a lever arm approximately a neutral stability and the possibility exists that lateral static stability could be produced by a judicious use of flow-control slots located somewhere along the fuselage.

d. The above estimates regarding weight, controllability, stability, etc. are not intended to represent deductions regarding the exact nature of the torpedo or cigar-shaped aircraft which were sighted by the airline pilots, [redacted] and [redacted], and others, they are merely statements of possibilities, which are intended to show that such an aircraft could support and control itself by aerodynamic means. The propulsive system of this type of vehicle would appear to be a jet or rocket engine. The specific fuel consumption of engines of this type would be rather high. This, coupled with the fact that aerodynamic lift on such a body would be accompanied by high drag, places a serious limitation on the range of the aircraft for any particular gross weight. If this type of unidentified aerial object has extremely long range it is probable that the method of propulsion is one which is far in advance of presently known engines.

POWER SOURCES:

- (a) The foregoing discussion is predicated upon the assumption that power sources presently available would have to be used. If an atomic energy powered engine were available, a small mass flow at a large velocity would accomplish the required lift and propulsive forces and the large energy expenditure would be of small importance.
- (b) However, the heat exchange requirements for the atomic powered engine appear to demand physical dimensions of inordinate size that presently would preclude the use of this power plant for aircraft. Experimental work in progress to convert the energy of the atomic pile directly to electricity, rather than heat, offer the promise of a more compact atomic power plant.

e. It has been established by Project Rand investigations that world resources, technical attainments and existing materials are adequate to permit construction of a space ship.

CONCLUSIONS:

- 1. The flying anomaly observed, remains unidentified as to origin, construction and power source.
- 2. A definite trend of flight headings has evolved as generally south in bearing.
- 3. Supporting evidence from separate reliable sources establish existence of this configuration.
- 4. An aircraft of the configuration described could support itself in flight by aerodynamic means.

Supplement to Trip Report to Atlanta

25 - 26 July Inclusive

THRU: Col Clingerman

TO: Col McCoy

1. Personnel interviewed on this trip were Capt [redacted] EAL pilot, and [redacted] Co-pilot.

2. Pilot Chile's was flying an Eastern Airlines DC-3 as indicated:

Altitude:	5,000 ft
Speed:	150 MPH indicated airspeed
Airways:	Mobile to Montgomery Ala
Compass Heading:	50° to 40°
Estimated time of arrival:	0053 EST, Doolley Fld

3. At 0.45, 24 July 1948, Capt [redacted] sighted a red exhaust glow from some 700 feet ahead, above and to the right of the plane. He made the remark: "Look, here comes a new Army Jet Job." The object approached in a slight dive, deflected a little to the left and passed the plane on the right, almost level and parallel to flight path, at a distance of approximately one-half miles. After passing, it pulled up very sharply and disappeared into a cloud. The description is essentially as follows:

The object appeared to be a wingless aircraft, 100 ft long, cigar-shaped and about twice the diameter of a "B-29". It had no fins or protruding surfaces. [redacted] thought it had a "snout" similar to a radar pole on the front and he had the impression there was a cabin with windows above - much like a pilot compartment - except that it appeared brighter. The illumination inside the body itself approximated the brilliance of a magnesium flare. He saw no occupants nor did [redacted]. Visible from the side only, was an intense, fairly dark, blue glow running the entire length of the object beneath the fuselage. The glow reminded [redacted] of a blue fluorescent factory light. The exhaust was described as a red-orange flame, the lighter color (orange) being predominant about the outer edges. [redacted] thought the flame flared out from a nozzle in the rear which he thought he perceived. The flame extended some 30 to 50 feet behind the object and became deeper in intensity (redder) and increased in length as the object pulled up into a cloud. No disturbance was felt from air waves, nor was there any wash or mechanical disturbance felt as the object passed. No sound was heard.

NOTE: Drawings by both pilots are in file under Incident #194.

2. Co-Pilot [redacted] attention was drawn to the object by [redacted] remark. His description of the object and its maneuver was very similar to that of "hiles" except that he did not observe a cockpit in front nor did he see any radar "snout". His drawing and description [redacted] also indicated smaller windows or openings on the side. He estimated the object passed at greater distance than did Capt [redacted]. He saw the "exhaust" as a parallel wide flame which seemed to come from the entire rear of the object rather than from a point never growing any wider than the width of the object itself, although he noticed the increase in length of the flame as the object "rolled up". He states it appeared at least half the length of the ship itself or approximately 50 ft.

3. Both pilots stated the night was clear with a bright moon and broken cloud coverage of 4/10 at 6,000 ft. Both estimated the object to be in sight approximately 10 to 15 seconds.

**Capt. Clarence S. Chiles,
Eastern Air Lines Pilot,
Is Special Adviser**

Although the detailed biography of Captain Chiles was not received in time for use in this issue, he will be recognized as one who played an important part in the UFO story in 1948.

It was in July of 1948 that Captain Chiles and the then 1st Officer John B. Whitted encountered a huge projectile-shaped device along the airway near Montgomery, Alabama. Chiles and Whitted both agreed that it was about 100 feet in length, twice the diameter of a B-29. Both men saw two rows of windows or ports through which a blue fluorescent glow was visible. The UFO, which they described as a machine traveling at 500 miles per hour or faster, veered sharply as it neared them and both reported they could feel the UFO's backwash rock their DC-3 as the strange object climbed steeply away.

Although Captain Chiles has not reported any UFO encounter since that date, he has maintained his interest in the saucer subject. As a veteran pilot who has had an extremely close range observation of a saucer, Chiles is well equipped to examine and evaluate authentic sighting reports for NICAP.

Reference your radio note of 29 July 1948 regarding Project "SIGN". [REDACTED] was relieved from active duty 30 December 1945. Discharged as a Major. Record looks good. Served approximately three (3) years. Promoted to Lt Col, Reserve, 9 Oct 1946. Primary MOS 1013. Pilot for Eastern Air Lines 15 Dec 1939 to 14 March 1942. Date of Birth: 28 June 1918.

[REDACTED] was relieved from active duty 14 December 1945 as 1st Lt. Record looks good. Served approximately two (2) years. Primary MOS 1093. Was bookkeeper prior to entering service. Date of birth: 28 June 1918.

STATEMENT OF [REDACTED]

I was flying co-pilot for Capt. [REDACTED] on Trip 576 which left Houston, Texas at 8:40 PM Eastern Standard Time, Friday night, July 22, 1948. At 0245 EST, we sighted a strange object coming toward us at a high rate of speed. We were at 5000 feet and our position was 25 miles southwest of Montgomery, Ala. The strange object had a stream of red fire coming from its tail. I assumed that it was a jet type airplane of the Army or Navy but as it came nearer I could see that it was much larger than any Army or Navy jet that I have ever seen or read about. It passed us on the right side of our DC-3. I estimate its speed in the neighborhood of 700 MPH but this is purely a rough estimate. We were holding a compass heading of 50 degrees and the object passed us going in the opposite direction. To me, the object seemed about a half-mile from us, flying straight and level. I ~~was~~ could see no wings supporting the object.

The object was cigar shaped and seemed to be about a hundred feet in length. The fuselage appeared to be about three times the circumference of a B-29 fuselage. It had two rows of windows, an upper and a lower. The windows were very large and seemed square. They were white with light which seemed to be caused by some type of combustion. I estimate that we watched the object at least 5 seconds and not more than 10 seconds. We heard no noise nor did we feel any turbulence from the object. It seemed to be at about 5500 feet.

I asked Capt. [REDACTED] what we had just seen and he said that he didn't know. Capt. [REDACTED] then contacted the company radio operator at Columbus, Ga., and asked him to contact Lawson Fld at Ft Benning, Ga., and find out if the Army had any jet or experimental planes in the vicinity. The company operator called us a few minutes later and stated that Lawson Field reported that they had no planes flying in our area. Capt. [REDACTED] then reported back to the company radio operator saying that a strange aircraft just passed us and it looked like some type of rocket ship.

We passed up Columbus because of ground fog and continued on to Atlanta.

STATEMENT OF CAPTAIN CLARENCE S. CHILES :

Atlanta, Ga.
Aug 3, 1948

UNCLASSIFIED

Mr. [REDACTED]
Eastern Air Lines
Miami, Fla.

The following is a report of an unidentified aircraft which was sighted by [REDACTED] and me, as we were twenty miles southwest of Montgomery, Ala. July 24, 1948, as we were on Eastern's trip 576.

At 2:45 A. M. we were cruising at 5,000 feet when there came, what looked like a Jet type of aircraft to our right and slightly above meeting us. It was a clear moonlight night with the visibility excellent; therefore, we were able to view the ship as it passed for a period of around ten seconds. It was clear there were no wings present, that it was powered by some jet or other type of power shooting flame from the rear some fifty feet. There were two rows of windows, which indicated an upper and lower deck, from inside these windows a very bright light was glowing. Underneath the ship there was a blue glow of light.

After it passed it pulled up into some light broken clouds and was lost from view. There was no prop wash or rough air felt as it passed.

After talking to the only passenger awake at the time, he saw only the trail of fire as it passed and pulled into the clouds. I called the company at Columbus and asked if there was any reported jet army craft and requested if the ATC had any aircraft under control. I was told that no such craft was reported by either source.

[REDACTED]
INCIDENT

24 July 1948

said it was "dark"

The glow reminded Chiles of a blue fluorescent factory light. The exhaust was described as a red-orange flame, the lighter color (orange) being predominant about the outer edges. [REDACTED] thought the flame flared out from a nozzle in the rear which he thought he perceived. The flame extended some 30 to 50 feet behind the object and became deeper in intensity (redder) and increased in length as the object pulled up into a cloud. *couldnt see this* No disturbance was felt from air waves, nor was there any wash or mechanical disturbance when the object passed. No sound was heard.

Co-pilot [REDACTED] attention was drawn to the object by [REDACTED] remark. His description of the object and its maneuvers was very similar to that of [REDACTED] except that he did not observe a cockpit in front nor did he see any radar "snout". His drawing and description also indicated windows or openings on the side. He estimated the object passed at greater distance than did Capt [REDACTED]. He saw the "exhaust" as a parallel wide flame which appeared to come from the entire rear of the object rather than from a nozzle never growing any wider than the width of the object itself, although he noticed the increased length of the flame as the object "pulled up".

7:00
5 to 10
The night was clear with a bright moon and broken cloud coverage of 4/10 at 6,000 ft. Both estimated the object to be in sight approximately 10 to 15 seconds, considered sufficient time for experienced pilots to determine whether the "ship" was a reflection, caused by some rare meteorological or astronomical phenomena -- or was a material object.

STATUS "UNKNOWN"

~~██████████~~
INCIDENT

24 July 1948

5

340

Stay down

At 2:45 in the morning, the pilot and co-pilot of an Eastern Airlines DC-3, flying at 5,000 feet between Mobile and Montgomery, Alabama sighted a dull red exhaust some 700 feet ahead, a little above and to the right of the airliner.

500 ft

Captain ~~██████████~~ the pilot, immediately turned to his co-pilot, ~~██████████~~ and remarked: "Look, here comes a new Army jet job".

The object ^{500 MPH} approached in a slight dive, deflected a little to the left and passed the plane on the right, almost level and parallel to flight path, at a distance of approximately one-half miles. After passing, it pulled up sharply and disappeared into a cloud.

The object appeared to be a wingless aircraft, 100 ft. long, cigar-shaped and about twice the diameter of a "B-29". It had no fins or protruding surfaces. ~~██████████~~ thought it had a "snout" similar to a radar pole on the front and he had the impression there was a cabin with windows above -- much like a pilot compartment -- except that it appeared brighter. The illumination inside the body itself approximated the brilliance of a magnesium flare. He saw no occupants nor did ~~██████████~~ visible from the side only, was an intense, fairly dark, blue glow running the entire length of the object beneath the fuselage.

straight such a
to avoid dropping them

on such a body would be accompanied by high drag, places a serious limitation on the range of the aircraft for any particular gross weight. If this type of unidentified aerial object has extremely long range, it is probable that the method of propulsion is one which is far in advance of presently known engines.

POWER SOURCES

- (a) The foregoing discussion is predicated upon the assumption that power sources presently available would have to be used. If an atomic energy powered engine were available, a small mass flow at a large velocity would accomplish the required lift and propulsive forces and the large energy expenditure would be of small importance.
- (b) However, the heat exchange requirements for the atomic powered engine appear to demand physical dimensions of inordinate size that presently would preclude the use of this powerplant for aircraft. Experimental work in progress to convert the energy of the atomic pile directly to electricity, rather than heat, offer the promise of a more compact atomic powerplant.

WIK

Conclusions: 1. The flying anomaly observed, remains unidentified as to origin, construction and power source.

2. A definite trend of flight headings has evolved as generally south in bearing.

3. Supporting evidence from separate reliable sources establish existence of this configuration.

4. It has been established by Project Rand investigations that world resources, technical attainments and existing materials are adequate to permit construction of a space ship. It is now aerodynamically feasible for subject configuration to fly. *An aircraft of the configuration described could support itself in flight by aerodynamic means.*

[Handwritten signature]

Robert R. Sneider
Capt, USAF
Project Officer

[REDACTED]

Flying Fuselages (Torpedo or Cigar-Shaped Body)

6.a. While the cigar or torpedo shaped body represents an efficient form for the fuselage of an airplane or the body of a guided missile, in neither case has it been used as a primary lift producing surface. However, an extension of the Pradt theory of lift indicates that a fuselage of the dimensions reported by the Eastern Airlines pilots [REDACTED] and [REDACTED] in the Montgomery, Alabama, incident could support a gross weight of approximately 12,000 pounds at an arbitrarily chosen stalling speed of 150 miles per hour, conservatively estimated. The Pradt theory probably gives very conservative values of maximum lift for bodies of this shape. If a lift coefficient twice as great were used (such a value has been given by a German scientist from history of his wind tunnel researches in Germany), a gross weight of 24,000 pounds could be supported at the assumed stalling speed.

b. Although the craft sighted by [REDACTED] and [REDACTED] was reported to be without wings or fins, it is possible it could have been equipped with extensible wings for take-off and landing, contained within the fuselage. In such a case a wing span of nearly 90 feet would be possible. If an aspect ratio of 5 were used (18 ft. mean aerodynamic chord), and if the wing design incorporated slots and flaps, the wing could support 115,000 pounds at a stalling speed of 150 mph. It is possible that the fuselage could also contribute lift with this arrangement, depending upon the incidence of the wing. This type of aircraft could also be partially supported in the take-off and landing condition by the vertical component of the jet thrust, if the landing and take-off took place with the fuselage axis, or the jet stream direction in a vertical or nearly vertical attitude. The further possibility that an extensible rotor, concealed within the fuselage, could have been used, would provide another method for landing and take-off that would allow wingless flight at very high speed. Such a design could result in a relatively large duration of flight and corresponding range.

c. While no stabilizing fins were apparent on the "flying fuselage" reported by [REDACTED] and [REDACTED], it is possible that vanes within the jet, operated by a gyro-servo system could have provided static stability, longitudinally, directionally and laterally. The same vanes could also have been used for accomplishing static balance or trim, as well as control for maneuvering. A square tailed body of the type reported with the center of gravity sufficiently far forward can develop, approximately, a neutral stability and the possibility exists that definite static stability could be produced by a judicious use of flow-control slots located somewhere along the fuselage.

d. The above estimates regarding weight, controllability, stability, etc, are not intended to represent deductions regarding the exact nature of the torpedo or cigar-shaped aircraft which were sighted by the airline pilots, [REDACTED] and [REDACTED], and others, they are merely statements of possibilities, which are intended to show that such an aircraft could support and control itself by aerodynamic means. The propulsive system of this type of vehicle would appear to be a jet or rocket engine. The specific fuel consumption of engines of this type would be rather high. This, coupled with the fact that aerodynamic lift

[REDACTED]

(4) Incident 4

Object #4 was observed by ~~Mr & Mrs. [redacted]~~, Mrs. ~~[redacted]~~, Mrs. ~~[redacted]~~ and Mr. ~~[redacted]~~, between the hours of 2045 to 2050, 26 July 1948, at Chamblee, Georgia and Augusta, Georgia. Description of this object seems to indicate that it was a meteor. Five of the observers said that the object was "football shaped"; that it appeared to be a green light with a silvery tail and that it observed level flight. The last observer stated that the speed was "10,000 to 20,000 mph" and that "it appeared to be 1/4 the size of a full moon", and that "it was a multi-colored, brilliant light trailing burning fragments." The terrific speed together with the description of a multi-colored light trailing burning fragments seems to establish this object as a meteor.

D. COMMENTS

1. The only incident which possesses absolute intelligence significance is incident #1. It is obvious that this object was not a meteor. There has been no evidence to support any findings of unreliability, nor have there been any major inaccuracies on the part of the witnesses.

2. Weather reports establish areas of visibility as stated in the observers' reports.

3. Available information from Ordnance, Army, Navy and AF Weather Bureau, Research Organizations, and other, failed to reveal any evidence of testing devices to which this incident could be attributed.

4. Apparently it is not of domestic origin since a thorough check of 225 flight schedules, both commercial and governmental, revealed that in only one instance did the reported flight paths cross. (See chart inclosed as Exhibit "I". This single exception was the flight in a northwesterly direction of a C-47 enroute Robins AF Base to Olsted Field, Pa. Its time of departure would have enabled it to have passed through the approximate areas on the 24 July 1948 where the sightings were reported. However, the factors of speed, direction of flight, maneuvers, configurations, lights and other factors rule out this one possibility.

5. Objects similar in configuration have been reported as follows:

- a. Rocket-like objects capable of immense speed were seen during the past summer in broad daylight in Denmark, Norway and Sweden.
- b. A wingless aircraft was observed moving at high speed at Obrechtstreet, Arnheim, The Hague, Holland. The object was seen intermittently through clouds and was reported to have two decks.

~~CONFIDENTIAL~~ 375 150057
4

T90200

(2) Incident #2

Object #2 was observed by [redacted] and [redacted] at 0230 hours 24 July 1948, while airborne, between Blackstone, Virginia, and Greensboro, North Carolina. This sighting is considered separately since the descriptions of speed as "meteoric" or "terrific", the manner of travel described as an arc or horizontal, and the fact that it "faded like a meteor" seem to indicate that the object seen was not the one observed in Incident 1.

(3) Incident #3

This object was observed between 2100 and 2300 hours 26th July 1948 at Chamblee, and Augusta, Georgia, by observers [redacted], [redacted], [redacted], Mrs. [redacted] and [redacted]. This object was not thought to be a meteor in that it maneuvered. The glow was described as varied in color but predominantly brilliant blue-white. The course was described as generally "southern". Although the dates seem to indicate that this sighting could not be the same as that described in incident 1, yet the major portion of this testimony refers to a "blue white light". Observations in the first instance describe a "blue glow" running the entire length of the fuselage. When viewed from the ground it is logical to assume that the blue glow would be mostly visible.

NOTE: In this connection, Dr. Josef Allen Hynek, astrophysicist, OSURF, who is presently to serve as consultant on this project, has advised that it is possible for a celestial body to appear to travel in a straight line and slant downwards. (It is extremely improbable, although aerodynamically possible, for some objects to achieve an effect of lift through the forces generated during their flight through the atmosphere). It is his further opinion that it is impossible for any celestial body to maneuver violently and make sharp turns. It is extremely unlikely for heavenly bodies to appear to move slowly when passing through the lower layers of the atmosphere, but, from greater distances, it is possible to observe far-distant bodies for extended periods of time. Objective size is contingent upon (1) distance of the heavenly body from the earth and (2) its mass. The manner of disappearance of a meteor is like a light suddenly blinking off.

- (1) That pertaining to sightings by [redacted] and [redacted]
- (2) That of [redacted] and [redacted]
- (3) That of [redacted], [redacted] and [redacted]
- (4) That of [redacted] and [redacted]

b. To exclude irrelevant factors in a systematic manner, the information presented in Exhibit "B" is presented in the order of occurrence and significance.

(1) Incident #1

LOW Altitude

- a. Object was sighted 24 July 1948 between 0140 and 0150 EST from the ground at Robins Air Force Base, Macon, Georgia.
- b. Object was again sighted from an altitude of 5,000 feet by [redacted] while flying a DC-3 some 20 miles south of Montgomery, Alabama. The time of the sighting was 24 July 1948 at approximately 0245 EST
- c. Both the [redacted] sighting and that of [redacted] & [redacted] describe the object as "cigar" or "cylindrical" in shape. (McKelvie perceived only the glow emitted by it)
- d. All observers agree that the object was traveling in a general southerly heading and that it was trailed by a flame varying in color and that it behaved like a normal craft insofar as disappearing from the line of sight was concerned.

NOTE: It is a known fact that atmospheric conditions such as varying degrees of humidity and incidence of light refraction often influence the color of the light observed. This would serve to explain why many observers conflict in their descriptions as to color of light displayed by the object or its trail.

- e. Four witnesses to this sighting are involved; three are trained observers. In no instance were there any indications of subversive or ulterior influences involved.
- f. Both the [redacted] account and that of [redacted] and [redacted] were officially made within a period of time that would preclude any chance of impressions being gained from radio or newspaper reports.

A. ORIGIN:

In compliance with verbal instructions from Maj General Cabell, Director of Intelligence, AFOI, this Hq proceeded to investigate the report concerning the sighting of an unidentified aerial object in the vicinity of Montgomery, Ala, occurring 24 July 1948 between the hours of 0140 and 0245 EST.

B. ACTION INITIATED

1. On 25 July 1948, Major R. A. Llewellyn, Project "SIGN" Officer, Mr. A. Beyermond, Technical Assistant to Col Clingerman, Mr. A. C. Loedding, Assistant Deputy for Technical Analysis Division, and Capt R. J. Grosedlose, Security Officer, proceeded to Atlanta, Georgia where they interviewed Capt [redacted] and Mr. [redacted] EAL pilots, and obtained their signed statements as to the anomaly observed. Copies of these statements together with drawings executed by Chiles and Whitted are appended as Exhibit "A". On 31 July 1948 Maj Llewellyn personally interviewed Mr. [redacted] the sole passenger awake during the hours of 0140 and 0245 EST, as to what he saw while a passenger aboard the DC-3 piloted by [redacted] and [redacted]. His statement is attached as Exhibit "B".

2. Following the above interrogations, requests were disseminated to Hq, USAF, Naval and commercial airlines by priority teletypes 2 Aug 1948 requesting data on aircraft movements in the general vicinity of Alabama, Florida, Mississippi, Georgia, South Carolina, Tennessee and North Carolina. Charts of these aircraft movements are submitted as Exhibit "C".

3. In compliance with Hq AMC letter dated 6 July 1948, the Sixth Office of Special Investigations (IG) District undertook an investigation pertaining to an aerial phenomena reportedly seen by various people within the 6th OSI District. A complete report of the various sightings, pages 1-16 is appended hereto as Exhibit "D". Further reports and statements as to reliability are also appended.

4. After the statements were received, a complete analysis as to the date and time, geographical location, and description of the object was charted. The completely assembled data, i. e., statements of witnesses, reliability statements, airline schedules and the collated data chart were forwarded to the various technical agencies to effect an evaluation and interpretation of the technological factors involved.

C. FACTUAL DATA

1. The collated data chart (Exhibit "E") was drawn up to effect a trend or pattern in regard to the reported sightings.

a. From this chart it is evident that three or possibly four separate incidents were involved:

~~██████████~~ INCIDENT (Cont)

out from a nozzle in the rear which he thought he perceived. The flame extended some 30 to 50 feet behind the object and became deeper in intensity (redder) and increased in length as the object pulled up into a cloud. No disturbance was felt from air waves, nor was there any wash or mechanical disturbance when the object passed. No sound was heard.

Co-pilot ~~██████████~~ attention was drawn to the object by ~~██████████~~ remark. His description of the object and its maneuvers was very similar to that of ~~██████████~~ except that he did not observe a cockpit in front nor did he see any radar "snout". His drawing and description also indicated windows or openings on the side. He estimated the object passed at greater distance than did Capt. ~~██████████~~. He saw the "exhaust" as a parallel wide flame which appeared to come from the entire rear of the object rather than from a nozzle never growing any wider than the width of the object itself, although he noticed the increased length of the flame as the object "pulled up".

The night was clear with a bright moon and broken cloud coverage of 4/10 at 6,000 ft. Both estimated the object to be in sight approximately 10 to 15 seconds, considered sufficient time for experienced pilots to determine whether the "ship" was a reflection, caused by some rare meteorological or astronomical phenomenon -- or was a material object.

After extensive investigations and studies; and after consideration of all possibilities, approaches and pertinent data to suggest at least one valid hypothesis or explanation to the sighting were exhausted -- the incident was appropriately classified as a true "Unknown".

CHILDS - WHITTED
INCIDENT

24 July 1948

At 2:45 in the morning, the pilot and co-pilot of an Eastern Airlines DC-3, flying at 5,000 feet between Mobile and Montgomery, Alabama, sighted a dull red exhaust some 700 feet ahead, a little above and to the right of the airliner.

Captain [REDACTED] the pilot, immediately turned to his co-pilot, [REDACTED], and remarked: "Look, here comes a new Army jet job". The object approached in a slight dive, deflected a little to the left and passed the plane on the right, almost level and parallel to flight path, at a distance of approximately one-half miles. After passing, it pulled up sharply and disappeared into a cloud.

The object appeared to be a wingless aircraft, 100 ft. long, cigar-shaped and about twice the diameter of a "B-29". It had no fins or protruding surfaces. [REDACTED] thought it had a "snout" similar to a radar pole on the front and he had the impression there was a cabin with windows above -- such like a pilot compartment -- except that it appeared brighter. The illumination inside the body itself approximated the brilliance of a magnesium flare. He saw no occupants nor did Whitted. Visible from the side only, was an intense, fairly dark, blue glow running the entire length of the object beneath the fuselage.

The glow reminded [REDACTED] of a blue fluorescent factory light. The exhaust was described as a red-orange flame, the lighter color (orange) being predominant about the outer edges. [REDACTED] thought the flame flared

INTELLIGENCE REPORT

FOR GENERAL USE BY ANY U. S. INTELLIGENCE AGENCY

From Technical Intelligence Division, MSL-40-5 Date 12 November 1948

Source U. S. civilians in Georgia, Virginia & Ala. Eval. A-2

Area Reported On Alabama, Georgia & Virginia Subject Unidentified Flying Objects

Observed on nights of 24 and 26 July 1948

Reference Proj "SIG" ltr, (D-2) to, co-respondence, previous report, etc., 30 Dec 47 "Flying Discs"

SUMMARY: Enter careful summary of report, containing substance succinctly stated. Answer questions where, when, what, how, how many, and give date of event. In a final one sentence paragraph give significance. Begin text on page 2

Detailed interrogations have been completed of persons reporting undetermined flying objects in the vicinity of Montgomery, Alabama, 24 and 26 July 1948, between the hours of 2130 and 0245 hours.

Analysis has been made of the compiled statements and other available evidence of each individual interrogated. The analysis was undertaken as only one of 173 reported incidents with an objective toward arriving at a definite pattern or trend in order to determine whether the objects reported were of domestic or alien origin, or a natural phenomena.

COMMENTS: Analysis of data under Incident #144 reveals that four separate cases are involved; one having occurred on 24 July 1948 and the others on the 26 July 1948. A preponderance of evidence is available to establish that in almost all cases an unidentified object was seen within stated times and dates over an extended area, pursuing a general Southerly course. Descriptions as to size, shape, color and movements are fairly consistent.

1. The following comments are offered regarding conclusion number 4 of the attached report:

a. It does not appear logical to bring in a conclusion regarding space ships when it was not discussed in the body of the report. This is not a conclusion that is based on this report so it does not belong in "Conclusions".

b. The expression, "It is now aerodynamically feasible for subject configuration to fly" implies that it was not feasible until the report was written. This does not make sense.

2. It is suggested that a conclusion to replace that discussed above merely state that an aircraft of the configuration described could support itself in flight by aerodynamic forces.

CHECK-LIST - UNIDENTIFIED FLYING OBJECTS

1. Date 24 July 43 Incident # 1443
2. Time 0230
3. Location Between Blackstone, Va., and Greensboro, N.C.
4. Name of observer Capt Perry R. Mansfield
5. Occupation of observer Capt on 571/23 EAL
6. Address of observer EAL
7. Place of observation Between Blackstone, Va., and Greensboro, N.C.
8. Number of objects. 1
9. Distance of object from observer N/S
10. Time in sight 3 seconds
11. Altitude N/S
12. Speed meteoric
13. Direction of flight Southerly
14. Tactics traveling horizontally
15. Sound N/S
16. Size N/S
17. Color N/S
18. Shape N/S
19. Odor detected N/S
20. Apparent construction N/S
21. Exhaust trails N/S
22. Weather conditions CAVU
23. Effect on clouds N/S
24. Sketches or photographs None
25. Manner of disappearance "died out" in the distance
26. Remarks: (over)

At about 0230 on July 24, 1948, [redacted], pilot, and Capt. [redacted] saw what they thought was an unusual meteor. It was brighter than any ever seen before and traveling in a horizontal direction, slightly above the horizon. It was observed for 3 seconds before it died out. At no time did it appear to travel in a downward direction. [redacted] & [redacted] discussed the matter that the meteor appeared to be traveling horizontally.

At the time they were traveling between Blackstone, Va., and Greensboro, S. C., the sky was clear and the visibility unlimited. They were on a magnetic heading of 240° and estimated the object to be on a bearing of about 210° from them - that is - about 30° to the left of their heading. It appeared to be traveling in a southerly direction, above, but close to the horizon.

NOTE: There is a 15 minute variance in time of this sighting (0230) to the rocket sighting at 0245 in ~~Area~~ Montgomery some 400 to 475 miles distant. The time (0230) also tallies with Inc. 144a Pilot [redacted] account of sighting a jet or rocket trail just after leaving Blackstone.

CHECK-LIST - UNIDENTIFIED FLYING OBJECTS

Incident # 144a

1. Date 24 July 48
2. Time 0230
3. Location Near Blackstone, Va., enroute to Raleigh-Durham
4. Name of observer Louis Feldvary
5. Occupation of observer Pilot
6. Address of observer LGA
7. Place of observation Air - near Blackstone, Va.
8. Number of objects only the trail seen
9. Distance of object from observer N/S
10. Time in sight N/S
11. Altitude N/S
12. Speed terrific speed
13. Direction of flight 230°
14. Tactics Trail covered an 80° to 90° arc laterally
15. Sound N/S
16. Size N/S
17. Color N/S Only trail seen - object not seen
18. Shape N/S
19. Odor detected N/S
20. Apparent construction N/S
21. Exhaust trails Seemed to be a jet or rocket trail
22. Weather conditions at 0230 at Blackstone: 0/70 0 4GF 112/73/72/wsm
5/967. Greensboro and Raleigh-Durham 0/15 plus
23. Effect on clouds N/S
24. Sketches or photographs None
25. Manner of disappearance N/S
26. Remarks: (over)

Shortly after checking Blackstone, at approx 0230, a trail was picked up that appeared to be a jet or rocket trail. The object leaving the trail was traveling at terrific speed in a southwesterly direction and as nearly as they could estimate they calculated the degree of travel as 230°

They were on a heading at the time of 215° . The jet or rocket trail at no time crossed their flight path. It was on the distant western horizon at approx 20° above the horizon. The trail covered an 80° to 90° arc laterally.

NOTE: There is a 15 minute difference in time of this sighting (0230) to the rocket sighting at 0245 in ~~Atlanta~~ ^{Montgomery} some 400 to 475 miles distant.

NOTE: The above time (0230) tallies with another sighting by another pilot in the vicinity of Blackstone, Va., who saw a very unusual meteor that appeared to be on a bearing of about 210° from them traveling in a southerly direction above but close to the horizon.

Supplement to Trip Report to Columbus, Ohio - 31 July 1948
Re: Atlanta Sighting

THRU: Col Clingerman

TO: Col McCoy

1. The object of this trip was to interview ~~██████████~~, a passenger aboard the Eastern Airlines DC-3, the night of 24 July 1948.

2. Mr. ~~██████████~~'s written statement is essentially as follows: He was occupying the 5th or 6th seat from the front of the plane on the right and would periodically glance out the window. There was a full moon which illuminated the ground and the skies and the ground could clearly be seen. Frequently they passed cumulus clouds. On one occasion as he was looking out he observed a sudden streak of light moving in a southeastern direction across the airway above the plane. He wondered if it were lightning but observed the flame moved in a straight line and not in a flare. The color was bright flame - he thought it was probably a light cherry red - although the edges were more of a yellow flame. He shifted his position in his seat for better observation, momentarily losing sight of it. Then he saw it again. He estimated the flame to be about 1/2 as far above the plane as the plane was above the ground. He saw no physical shape - only a streak of flame moving in a straight line. The whole experience was momentary so that detailed observation was absent. He heard no sound but stated that the vibration of the plane was much greater than normal and that it was not possible to hear any sound from the outside.

3. In the interview Mr. ~~██████████~~ stated to Maj Llewellyn that the pilots seemed quite excited and that they appeared nervous over the episode.

DETAILS:

AT MARIETTA AFB, GEORGIA

1. At approximately 1400 hours, 6 October 1949, Captain [REDACTED], Eastern Air Lines, Atlanta, Georgia, stated that he had seen an unidentified flying object on 23 July 1948, which he assumed to be a secret type UAF aircraft, and reported same to the Eastern Air Lines Public Relations Representatives and Safety Board Officials.

2. On 6 October 1949, Captain [REDACTED], [REDACTED], Atlanta, Georgia, was interviewed and supplied the following data:

Date of sighting	23 July 1948
Time of sighting	0340 hours
Place of sighting	30 to 50 miles southwest of Montgomery, Alabama. Observer's position was from the cockpit of an Eastern Air Lines D-3 at approximately same altitude as unidentified flying object.
Number of objects	One (1)
Celestial phenomena	None.
Distance of object from observer	Observer had forward and going away view from about 2 to 3 miles distance.
Time in sight	5 to 8 seconds
Appearance of object	A double-decked cigar shape fuselage, illuminated thru apparent port-holes, resembling a D-3 6 without wings in size and appearance.
Direction of flight	Northeast to southwest.
Tactics of maneuvers	Object appeared to be traveling in straight and level flight at same altitude but to the right and in an opposite direction to

SUBJECT: Project "SIGN"

Gentlemen:

This Command is desirous of obtaining all flight schedules of commercial aircraft flown in the Mississippi, Alabama, Tennessee, North Carolina, South Carolina, Georgia and Florida areas, on 23 and 24 July 1948, the type of aircraft flown, time and place of departure, and the time and place of destination.

Attention has been directed to your office as being the most qualified to furnish this Command with the above information.

Any cooperation you may give will be greatly appreciated.

Correspondence should be marked for the attention of MCIAXO-3 as indicated in the upper left-hand corner of this letter. This facilitates prompt handling of your communication.

Yours very truly

TITLE: SIGHTING OF UNIDENTIFIED FLYING OBJECT; CHARACTER: SPECIAL INQUIRY - UNCONVENTIONAL AIRCRAFT; FILE NO: 24-185; DATE: 2 November 1949

Tactics of maneuvers (cont'd)

that of observer. After passing abreast of airliner carrying observer, object tended to disappear upwards to the rear and disappeared into overcast.

Evidence of exhaust

A cherry red flame extended 50 to 75 feet to rear of object.

Effect on clouds

None.

Lights

The forward two-thirds of cylindrical unidentified flying object appeared to have two well defined rows of cabin lights.

Support

No wings

Propulsion

Appeared to be result of jet power.

Control

Excellent - well coordinated gentle climbing turn into clouds prior to disappearance

Air ducts

None observed.

Speed

At least 500 miles per hour.

Sound

None audible.

Manner of disappearance

Disappeared into cloud bank to rear of observer, after slight climbing turn.

Weather

(at 5000) Visibility - Excellent, with 25 mile range. High - broken clouds - brilliant moonlight - faint trace of light breeze.

[REDACTED] UNCLASSIFIED

ARTICLE ON PAGE ONE, ATLANTA JOURNAL, DATED 24 JULY 1948

Two Eastern Air Lines pilots reported Saturday that their plane Friday night passed a tremendous wingless aircraft that shot 40 feet of flame from the back end and was traveling 500 - 700 miles per hour.

Capt. [REDACTED] and Co-pilot [REDACTED] said the object looked like a B-29 fuselage "blown up about 4 times" and was brilliantly lighted with 3 decks of big square windows. The object passed within several hundred feet of the DC-3 and then shot up into the clouds.
